2007 CMHS Uniform Reporting System Output Table

General Notes: ME, FY2007

Table Number	General Notes
9 & 11	DIG family and youth surveys were administered by mail in the Fall of 2007. Surveys were mailed to all recipients of targeted case management and in-home supports for FY07. A total of 3041 surveys were mailed, 1444 contacts were made. Only 78 individuals responded to the survey for a total response rate of 5%. Due to the small response and unrepresentable information, data has not been included in this report. It is suspected that the length of this survey is leading to low response rates, however, response rate for this survey has been traditionally low and continuing to fall for families and children. Phone survey methodology was explored in early spring of 2007, however, due to the costs for service, the DIG grant was unable to support the methodology. Maine will continue to explore revisions to the current methodology in an effort to increase response rates for a represent able sample. This exploration will begin in January 2008.
16	Data obtained for Supported Housing, Therapeutic Foster Care, Multi-Systemic Therapy, Family Functional Therapy in Table 16 are captured from data sources not capturing data consistent with MaineCare database. SMI and SED served is captured from state Medicaid data system. DIG staff are working to align data sources for consistent reporting.
17	Data obtained for Integrated Treatment is captured by the DHHS Office of Substance Abuse Services and is not consistent with MaineCare database. SMI served is captured from the state Medicaid data system. DIG staff are working to align data sources for consistent reporting.
