**Note:**

This table uses data from URS/DIG Table 2a, Table 2b and from the US Census Bureau.

All denominators use US Census data from 2006.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

Regional groupings of States based on SAMHSA's Block Grant Regions.

**Note:**

This table uses data from URS/DIG Table 14a, Table 14b and from the US Census Bureau.

All denominators use US Census data from 2006.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

Regional groupings of States based on SAMHSA's Block Grant Regions.

**Note:**

Admission Rate = number of admissions divided by total served during the year.

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS/DIG Table 3, State Total Served During Year is calculated using data from URS/DIG Tables 3.

This table uses data from URS/DIG Tables 3 and 6.

**Note:**

US totals are based on states reporting.

This table uses data from URS/DIG Table 16

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

**State Notes:**

PATH = PATH, Inc. of ND. Duplicated data under Children with SED due to data from 2 data systems, and across age range 18-20.

US totals are based on states reporting.

This table uses data from URS/DIG Table 16.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

**State Notes:**

PATH = PATH, Inc. of ND. Duplicated data under Children with SED due to data from 2 data systems, and across age range 18-20.

## 2007 CMHS Uniform Reporting System Output Table

General Notes: ND, FY2007

| Table Number | General Notes  |
|--------------|--|
| 2a, 2b       | Data for these tables are now being collected from four independent data sources. All 4 independent sources yield unduplicated counts, however, unduplicated counts across all systems can be inaccurate and cumbersome.   |
| 2a, 2b       | Data continues to be refined from previous years with data for this year being pulled from 4 different, independent sources (community mental health database, state hospital data system, children's residential treatment, and therapeutic foster care). ND has independent data systems. These systems are used for a variety of purposes, such as billing, eligibility, progress notes, etc., with data collection being one piece. Individuals receiving services by the SMHA do not have a unique identifier across these independent data systems. Each independent system collects client demographic information so unduplicated counts can be achieved. However, unduplicated counts across all systems can be inaccurate and is cumbersome. The ND Department of Human Services has begun development of an overview system to assign a unique client identifier to an individual receiving services which will cross all independent data systems. This will enable more accurate data collection and reporting, with the goal of unduplicated counts. |
