Note:

This table uses data from URS/DIG Table 2a, Table 2b and from the US Census Bureau.

All denominators use US Census data from 2006.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

Regional groupings of States based on SAMHSA's Block Grant Regions.

* Reported under Hispanic Origin

State Notes:

2A: Age State psychiatric hospitals only serve adults (i.e., age ≥ 18).

Gender None

Race: MIS for State psychiatric hospitals and community programs differ in the accounting of ethnicity. Hispanic count on this table is for hospital patients not found in community program MIS.

Overall: None

2B: Age State psychiatric hospitals only serve adults (i.e., age ≥ 18).

Gender None

Race: MIS for State psychiatric hospitals and community programs differ in the accounting of ethnicity. Hispanic count on this table is for hospital patients not found in community program MIS.

Overall: None

2007 CMHS Uniform Reporting System Output Table

General Notes: OH, FY2007

Table Number	General Notes
9	A Social Connectedness Scale was created from 4 items collected from our Ohio Outcomes System Quality of Life section (for ADULTS ONLY): 1. How do you feel about the amount of friendship in your life? 2. How do you feel about the amount of meaningful activity in your life (such as work, school, volunteer activity, leisure activities)? 3. How do you feel about the way you and your family act toward each other? 4. How often do you have the opportunity to spend time with people you really like?
9	Items 1-3 were answered on this 5-point scale: 1=Terrible, 2=Mostly dissatisfied, 3=Equally satisfied/dissatisfied, 4=Mostly satisfied, 5=Very pleased, 8=Does not apply (for question #3). Item 4 was answered on this 5-point scale: 1=Never, 2=Seldom/rarely, 3=Sometimes, 4=Often, 5=Always. Similar to the MHSIP Social Connectedness scale, Ohio's Social Connectedness scale was computed if the individual had at least 3 of the 4 items. (Preliminary stats on a subsample of the population indicated that 84.2% of cases have all 4 items, another 5.7% have at least 3 items (89.8%); 0.9% have only 1 or 2 items, and 9.2% do not have any of the 4 items). The Reliabilities (Cronbach's alpha) for Ohio's Social Connectedness scale on the subsample were adequate: total sample alpha = .74; alpha's ranged from .73 to .75 by sex to .71 to .75 by race.
9	To create cut-off scores for reporting in the Block Grant we followed a similar formula as the MHSIP Social Connectedness scale. However, the MHSIP Social Connectedness items are on a 5 point scale with 1 being high - Ohio's Social Connectedness scale is on a 5 point scale with 5 being high. Thus instead of using the MHSIP cutoff score of 2.5 Ohio's cutoff score is 3.5, however they represent the same relative value.
11	Methodology for Collecting Consumer Survey Data (both adults and children/adolescents): Ohio Consumer Outcome System is self administered at mental health Provider's with assistance available (see web site at http://www.mh.state.oh.us/initiatives/outcomes/outcomes.html). Consumer Quality Review Team (CQRT) has consumers conduct face to face interviews with other consumers (see CQRT web site at http://www.namiohio.org/cqrt.html). For Sample Size and Response Rates (both adults and children/adolescents) please see Block Grant Report for numbers responding to each question. Two separate data bases were used-CQR T and Consumer Outcomes. CQRT was conducted as face to face interviews of consumers by other consumers. Ohio Mental Health Consumer Outcome System was self administered through providers mostly on self administered questionnaire-sometimes computerized & also available as telephone option.
14A	SMI (adults) & SED (kids) Definitions: Ohio Administrative Code 5122-24-01 Certification definitions...(B) Applicability...(82) "Person with serious emotional disturbance" means a person less than eighteen years of age who meets the department's 508K certification criteria, which is a combination of duration of impairment, intensity of impairment and diagnosis. The following criteria are used in the certification process: (a) Criteria: (i) Under eighteen years of age; (ii) Marked to severe emotional/behavioral impairment; (iii) Impairment that seriously disrupts family or interpersonal relationships; and (iv) May require the services of other youth-serving systems (e.g., education, human services, juvenile court, health, mental health/mental retardation, youth services, and others).
14A	Continued: (b) Marked-to-severe behavioral impairment is defined as impairment that is at or greater than the level implied by any of the following criteria in most social areas of functioning: (i) Inability or unwillingness to cooperate or participate in self-care activities; (ii) Suicidal preoccupation or rumination with or without lethal intent; (iii) School refusal and other anxieties or more severe withdrawal and isolation; (iv) Obsessive rituals, frequent anxiety attacks, or major conversion symptoms; (v) Frequent episodes of aggressive or other antisocial behavior, either mild with some preservation in social relationships or more severe requiring considerable constant supervision; and (vi) Impairment so severe as to preclude observation of social functioning or assessment of symptoms related to anxiety (e.g., severe depression or psychosis). (c) An impairment that seriously disrupts family or interpersonal relationships is defined as one: (i) Requiring assistance or intervention by police, courts, educational system, mental health system, social service, human services, and/or children's services; (ii) Preventing participation in age-approp
14A	Continued: (iii) In which community (home, school, peers) is unable to tolerate behavior; or (iv) In which behavior is life-threatening (e.g., suicidal, homicidal, or otherwise potentially able to cause serious injury to self or others). (83) "Person with severe mental disability" means a person eighteen years of age or older with a severe mental or emotional disability who meets at least two of the three following criteria of diagnosis, duration, and disability (a) Diagnosis: the current primary diagnosis is delusional disorders (DSM IIIR 297.10); dissociative disorders (DSM IIIR 300.14); eating disorders (DSM IIIR 307.10, 307.51, 307.52); mood disorders (DSM IIIR 296.3x, 296.4x, 296.5x, 296.6x, 296.70, 300.40, 301.13, 311.00), organic mental disorders (DSM IIIR 290.0, 290.10, 290.1x, 290.4x, 294.10, 294.80); personality disorders (DSM IIIR 301.00, 301.20, 301.22, 301.40, 301.50, 301.60, 301.70, 301.81, 301.82, 301.83, 301.84, 301.90),
14A	Continued: psychotic disorders (DSM IIIR 395.40, 295.40, 295.70, 298.90); schizophrenia (DSM IIIR 295.1x, 295.2x, 295.3x, 295.6x, 295.9x); somatoform disorder (DSM IIIR 307.80); other disorders (DSM IIIR 313.23, 313.81, 313.82); or other specified. (b) Duration: the length of the problem can be assessed by either inpatient or outpatient use of service history, reported length of time of impairment, or some combination, including at least two prior hospitalizations of more than twenty-one days or any number of hospitalizations (more than one) totaling at least forty-two days prior to the assessment, or ninety to three hundred sixty-five days in a hospital or nursing home within three prior years, or major functional impairment lasting more than two years, resulting in utilization of outpatient mental health services on an intermittent and/or continuous basis.
14A	Continued: (c) Disability/functional impairment: severity of disability can be established by disruption in two or more life activities, including but not limited to: employment, contributing substantially to one's own financial support (not to be entitlements), independent residence, self-care, perception and cognition, stress management/coping skills, interpersonal and social relations.
17	Ohio uses multiple data bases, and some do not have Hispanic/Latino data.
