2007 CMHS Uniform Reporting System Output Table**General Notes: WA, FY2007**

Table Number	General Notes
Table 16, 17	Collected this information via a Provider Survey which limited the amount of individual-level client data that could be collected. Therefore, we don't have any of the demographic breakouts and we don't know for sure if the clients who received these services are seriously mentally ill or seriously emotionally disturbed. Also, we cannot answer any of the questions about implementation - all of our responses would be don't know at this time. However, when we are able to assess this information in the future it would be helpful to have a response option that allowed for some providers implementing using toolkit and some implementing without.
Table 18	We have 2 state hospitals. The numbers are aggregated to arrive at the total state hospital count, but not unduplicated across the 2 hospitals. Also, one hospital includes Hispanic in the ethnicity and the other breaks it out separately as Hispanic Origin. In the community setting Asian includes Hawaiian/Pacific Islander. Finally, we cannot produce an unduplicated statewide count across hospitals and community settings, because these are 3 different data sources for pharmacy data and they are not linked.
