2007 CMHS Uniform Reporting System Output Table

General Notes: WI, FY2007

Table Number	General Notes
14A	SMI Definition 1: State definition is similar to federal definition, but worded differently: "Persons in Need of Ongoing, High Intensity, Comprehensive Services - have a primary diagnosis of a major mental illness or severe Emotional disturbance and they have substantial needs for psychiatric and medical treatment, including substance abuse, daily living skills, budgeting, job training, family support and support at school. Some may have a history of trauma, such as physical or sexual abuse or neglect, which contributes to the mental health problem. Persons in this category may need help to access community resources, such as safe, affordable housing, benefits and entitlements, and legal assistance. They need support and assistance in combating stigma and discrimination. Without ongoing, comprehensive services, these persons will be at the highest risk for increased psychiatric hospitalizations or extensive reliance on placement in nursing homes, child-caring institutions, and other supervised settings; confinement in jail; homelessness; and increased harm to self. These persons will sometimes experience acute psychiatric crises as a result of increases in symptoms of mental illness or environmental stresses. Because some may be reluctant to access mental health or other services, extensive outreach may be needed to engage them into services. The person and family need ongoing, comprehensive treatment and intensive community support and wraparound services to help them achieve and maintain a more stable level of functioning and a lifestyle relying more on natural supports and less on formal mental health services."
14A	SMI Definition 2: State definition also includes this group: "Persons in Need of Ongoing Low Intensity Services - have a diagnosed mental disorder. They function in a fairly stable manner but may occasionally experience acute psychiatric crises. Some may have a history of trauma, such as physical or sexual abuse or neglect, which contributes to the mental health problem. These persons need services such as ongoing medication management (prescription, evaluation, and monitoring), case management, and/or periodic support contacts. With the benefit of such services, they are usually able to live relatively independently and have good potential for recovery and increasing success in community living. Without ongoing supports and services, however, they can be at a serious risk for relapse and for much more costly treatment, including intensive crisis intervention and psychiatric hospitalization."
14A	SED Definition 1: State definition is similar to federal definition, but worded differently: "Persons in Need of Ongoing, High Intensity, Comprehensive Services - have a primary diagnosis of a major mental illness or severe emotional disturbance, and they have substantial needs for psychiatric and medical treatment, including substance abuse, daily living skills, budgeting, job training, family support and support at school.
