16	Assertive Community Treatment clients are counted according to manual regional reports that do not have data broken down according to gender and age. Initial client profile data captures this for total clients served. In other words, we know the gender breakdown of total served, but not the gender of ACT clients.
17	Clients receiving co-occurring treatment services are counted according to manual regional reports that do not have data broken down according to gender and age. Initial client profile data captures this for total clients served. In other words, we know the gender break down of total served, but not the gender of clients receiving co-occurring treatment. Additionally, co-occurring disorder treatment data provided by regional SMHA's as baseline for FY08 does not include race or gender data.
