T16 Best Data for ACT; Supported employment - only included those programs that approximate core features of SAMHSA model; Supported housing based on number of units.

T17 Two programs targeting ~ 30 patients this year are following toolkit model. Remainder are from NAMI family to family program; Some co-occurring programs are strictly following IDDT toolkit; most, however are not.

General Notes: Iowa, FY 2008

Table Number	General Notes
4a	Data reported on Table 4a does not match those reported on Table 4 because we do not have a single system that tracks primary diagnosis of a client. The counts on Table 4a represent duplication of clients because of them having multiple diagnoses throughout the year and different data sources.
9, 11, & 11A	Reporting on these tables is on hold pending data from Telesage (MHSIP Consumer Survey).
20A	Significant difference in discharges for FY08 due to policy change: Due to the implementation of Avatar, unit changes require readmission to the system. In previous years, unit changes remained under the same admission, no discharge and readmission required. This is more noticeable with the younger age groups as they change units more than the other groups.
