Table Number	General Notes
3 & 6	Admissions to psychiatric continuing care units run by the SMHA, but located in facilities operated by the state Public Health agency are included in the State Hospital data.
3 & 6	Individuals admitted to the three community mental health centers (CMHCs) delivering acute care and one CMHC providing continuing care are included in "Other Psychiatric Inpatient". It also includes admissions to private inpatient facilities through contract with the SMHA.
5	The SMHA is in the process of obtaining data on behavioral health clients served by the state Medicaid agency and should be able to report on this table when data are available.
11	Adult Consumer Surveys: The Official 28 Item MHSIP Outpatient Tool was modified to include the modules on social connectedness, improved functioning and criminal justice contact, as well as several additional questions relating to outcomes. The survey sample was drawn from persons currently in services, however some of these individuals may no longer have been enrolled in that service when interviewed. The universe for the survey sample was adult consumers with a serious mental illness who were receiving at least one service from the SMHA. The SMHA contracted with the Center for Mental Health Services Research at U Mass Medical School to administer the survey and provide analysis.
11	Child/Family Consumer Surveys: The survey sample was drawn from persons currently in services, however some of these individuals may no longer have been enrolled in that service, when interviewed. The universe for the survey sample was adolescents age 16 and older with Serious Emotional Disturbance or Serious Mental Illness currently receiving Child/Adolescent Case Management services from the SMHA, and family members of all children/adolescents enrolled in Child/Adolescent Case Management services from the SMHA. The SMHA contracted with the Center for Mental Health Services Research at U Mass Medical School to administer the survey and provide analysis.
12	Child/Adolescent services for the SMHA are provided through age 18, with Adult services delivered for ages 19 and older. Calculations for this table use the federal definition of Child and Adult. Ages 0 - 3 are served primarily by agencies other than the SMHA, but eligibility criteria for SMHA does not preclude service provision for this age group. Individuals counted in the total served by the SMHA who are referred by the criminal justice system, or seen for outpatient crisis evaluations may or may not meet SMI/SED definitions. All persons who meet the eligibility determination standards for continuing care community services meet SMI/SED definitions.
12	The calculations to determine a co-occurring substance abuse disorder for total population served do not include 3738 adults and 336 children/adolescents served in SFY 08 for whom no diagnosis was on file as of the close of the reporting period. The calculations to determine a co-occurring substance disorder for adults with SMI and children/adolescents with SED do not include 3619 adults and 315 children/adolescents served in SFY 08 for whom no diagnosis was on file as of the close of the reporting period. The calculation for the percentage of persons with a co occurring diagnosis of substance abuse is calculated by counting the number of persons with a diagnosis of substance abuse on file as of the close of the reporting period divided by the total served as reported in Table 2 (Total Served) and Table 14 (Total SMI/SED), for whom there was a diagnosis on file as of the close of the reporting period.
15	Living situation is measured at admission for all clients and at the annual review for case managed clients only. In addition, it is assessed annually for all inpatients with length of stay (LOS) greater than 6 months. Count for "Residential Care" does not include individuals receiving Supported Housing services. These individuals are counted under "Private Residence". The SMHA does not provide crisis residence services and adult fostercare. Information on individuals receiving these services through other agencies is not available in the SMHA Mental Health Information System (MHIS).
15	The SMHA does not provide crisis residence services and adult fostercare. Information on individuals receiving these services through other agencies is not available in the SMHA Mental Health Information System (MHIS). The SMHA does not provide "traditional" fostercare for children and adolescents and does not presently collect this data for those clients receiving these services through the state Department of Social Services. The SMHA does offer therapeutic fostercare as part of a spectrum of services for children and adolescents. Data on clients receiving this service is reported in Table 16.
16	The data source used to report persons receiving Supported Employment reports Hispanic origin as a Race. It also does not contain information on age for 293 individuals. The SMHA is administering the Drake fidelity scale to a sampling of programs delivering Supported Employment services through the MA Medicaid Infrastructure and Comprehensive Employment Opportunities (MMICEO) grant received by the state Executive Office of Human Services. Fidelity for ACT/PACT programs is measured by a team consisting of SMHA staff, consumers and a consultant with expertise in ACT, using a scale developed internally, based upon the SAMHSA EBP toolkit. Fidelity is measured every twelve to eighteen months.
18	The SMHA has customized the PORT guidelines to include additional treatment recommendations. The SMHA is presently able to report only on individuals who were served in the state hospital setting. For this table only, individuals admitted to the three community mental health centers (CMHCs) delivering acute care and one CMHC providing continuing care are included in the state hospital count. Data is not available for individuals admitted to the DMH operated psychiatric units located in two state Public Health facilities.
20A	Since most admissions to the state hospital system occur only after one or more acute inpatient hospitalizations, the readmission rates displayed in this table do not necessarily present an accurate representation of the total inpatient readmission rate for discharges in the reporting year. The SMHA is working with the state Medicaid agency to obtain inpatient admission data for all behavioral health clients, which would be used to complete the optional Table 21.
20B	Since most admissions to the state hospital system occur only after one or more acute inpatient hospitalizations, the readmission rates displayed in this table do not necessarily present an accurate representation of the total inpatient readmission rate for discharges in the reporting year.
