General Notes: Minnesota, FY 2008

Table Number	General Notes
2	Minnesota's population served appears to have increased substantially between the 2007 and 2008 URS tables. The total population served on Table 2A in 2007 was 85,802, compared to the total served in 2008 of 163,059. The population served now combines the Community Mental Health Reporting System (CMHRS) and the Medicaid Management Information System (claims data). Another change is that these data are from calendar year 2007, rather than State FY 2008.
3	Other Psychiatric Inpatient includes regular psychiatric beds and state-contracted beds in community hospitals. Residential treatment centers includes mental health treatment in centers licensed by the SMHA.
4	The number of people employed in State FY 2008 appears to be less than in State FY 2007. This is because Minnesota used a different population from which to measure employment. This population receives Assertive Community Treatment, psychosocial rehabilitation services, or day treatment services. We chose to use this population because we receive quarterly reports from those services, so we can tell if changes happen in employment and housing. 15,189 people received these services in FY08.
6	Total Served in Other Psychiatric Inpatient settings increased between 2007 and 2008. In addition, admissions to Other Psychiatric Inpatient settings increased. In 2007, these categories included only psychiatric beds that the SMHA had contracts with. In 2008, we increased the total population served to include all Medicaid enrollees who received mental health services. This expanded Other Inpatient to include all psychiatric stays in community hospitals. See Comment 1, related to Table 2, for more information.
6	LOS for discharged adults decreased in 2008. Minnesota has replaced five of its regional treatment centers with state-operated community behavioral health hospitals (16 beds each). The focus of these state-operated, community hospitals has changed from our traditional regional treatment center focus as has the population being served.
8	Minnesota had a large increase in community block grant expenditures for non-direct service activities in 2008. The increase was the result of using funds to provide training and technical assistance to providers.
9	MN changed its adult consumer survey. The evaluation questions which are used to calculate the domains have two response choices: Agree and Disagree. If a person feels the response should be in the middle, they leave it blank.
11	MN changed its adult and children's consumer surveys to simplify the instrument and therefore improve response rate. The evaluation questions which are used to calculate the domains have two response choices: Agree and Disagree. If a person feels the response should be in the middle, they leave it blank. The adult survey questions changed, also, so that some of the domains have different questions in them this year. In addition, the adult survey is anonymous this year. The children's survey has always been anonymous. The two surveys are attached to these tables.
11	MN changed the adult population that it surveys. In the past 3 years, people with Serious Mental Illness (SMI) were surveyed. In 2008 the population from which the sample was drawn was changed to be those persons who received Assertive Community Treatment, Adult Rehabilitative Mental Health Services, or day treatment during State FY08.
12	Tables which are labeled 2007 are developed using calendar year 2007 data. Tables labeled 2008 are developed using State FY 2008 data. (July 1, 2007 through June 30, 2008)
12	The percentage of children/adolescents who have co-occurring mental illness and substance abuse decreased between 2007 and 2008. Minnesota estimates this percentage using questions on a consumer survey. Estimates based on the survey have a confidence interval of +/- 5% in 2007 and +/- 3% in 2008. When comparing the intervals, they overlap, and we cannot say that there is any difference between the two years.
14	Minnesota's population served appears to have increased substantially between the 2007 and 2008 URS tables. The total population served on Table 2A in 2007 was 85,802, compared to the total served in 2008 of 163,059. The population served now combines the Community Mental Health Reporting System (CMHRS) and the Medicaid Management Information System (claims data). Another change is that these data are from calendar year 2007, rather than State FY 2008.
15	Data for living situation is reported for adults receiving Assertive Community Treatment, psychosocial rehabilitative services, or day treatment services.
16	Minnesota is not reporting the number of people receiving Supported Housing this year. There is not a way to gauge if the supported housing services that people in Minnesota receive are fidelity-based. Supported Employment numbers have dropped substantially because only people receiving fidelity-based supported employment services are counted. These people are in 6 projects that are funded by a Johnson & Johnson grant.
17	The number of people receiving Medication Management increased in 2008. This is related to Comment 1, Table 2, which explains Minnesota now includes all Medicaid enrollees who received mental health services in our target population.
18	MN is unable to get drug information for people receiving services in community settings, but not paid by Medicaid, or for State hospitals.
21	Both the 30-day and 180-day recidivism rates increased from 2007. Minnesota has replaced five of its regional treatment centers with state-operated community behavioral health hospitals (16 beds each). The focus of these state-operated, community hospitals has changed from our traditional regional treatment center focus as has the population being served.

Definition of Mental Illness from the Minnesota Mental Health Act

Subd. 20. **Mental illness.**

- (a) "Mental illness" means an organic disorder of the brain or a clinically significant disorder of thought, mood, perception, orientation, memory, or behavior that is listed in the clinical manual of the International Classification of Diseases (ICD-9-CM), current edition, code range 290.0 to [302.99](#) or 306.0 to 316.0 or the corresponding code in the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders (DSM-MD), current edition, Axes I, II, or III, and that seriously limits a person's capacity to function in primary aspects of daily living such as personal relations, living arrangements, work, and recreation.
- (b) An "adult with acute mental illness" means an adult who has a mental illness that is serious enough to require prompt intervention.
- (c) For purposes of case management and community support services, a "person with serious and persistent mental illness" means an adult who has a mental illness and meets at least one of the following criteria:
 - (1) the adult has undergone two or more episodes of inpatient care for a mental illness within the preceding 24 months;
 - (2) the adult has experienced a continuous psychiatric hospitalization or residential treatment exceeding six months' duration within the preceding 12 months;
 - (3) the adult:
 - (i) has a diagnosis of schizophrenia, bipolar disorder, major depression, or borderline personality disorder;
 - (ii) indicates a significant impairment in functioning; and
 - (iii) has a written opinion from a mental health professional, in the last three years, stating that the adult is reasonably likely to have future episodes requiring inpatient or residential treatment, of a frequency described in clause (1) or (2), unless ongoing case management or community support services are provided;
 - (4) the adult has, in the last three years, been committed by a court as a person who is mentally ill under chapter 253B, or the adult's commitment has been stayed or continued; or
 - (5) the adult (i) was eligible under clauses (1) to (4), but the specified time period has expired or the adult was eligible as a child under section [245.4871](#), subdivision 6; and (ii) has a written opinion from a mental health professional, in the last three years, stating that the adult is reasonably likely to have future episodes requiring inpatient or residential treatment, of a frequency described in clause (1) or (2), unless ongoing case management or community support services are provided.

Attachment II

Subd. 6. Child with severe emotional disturbance. For purposes of eligibility for case management and family community support services, "child with severe emotional disturbance" means a child who has an emotional disturbance and who meets one of the following criteria:

- (1) the child has been admitted within the last three years or is at risk of being admitted to inpatient treatment or residential treatment for an emotional disturbance; or
- (2) the child is a Minnesota resident and is receiving inpatient treatment or residential treatment for an emotional disturbance through the interstate compact; or
- (3) the child has one of the following as determined by a mental health professional:
 - (i) psychosis or a clinical depression; or
 - (ii) risk of harming self or others as a result of an emotional disturbance; or
 - (iii) psychopathological symptoms as a result of being a victim of physical or sexual abuse or of psychic trauma within the past year; or
- (4) the child, as a result of an emotional disturbance, has significantly impaired home, school, or community functioning that has lasted at least one year or that, in the written opinion of a mental health professional, presents substantial risk of lasting at least one year.

The term "child with severe emotional disturbance" shall be used only for purposes of county eligibility determinations. In all other written and oral communications, case managers, mental health professionals, mental health practitioners, and all other providers of mental health services shall use the term "child eligible for mental health case management" in place of "child with severe emotional disturbance."

Subd. 15. Emotional disturbance. "Emotional disturbance" means an organic disorder of the brain or a clinically significant disorder of thought, mood, perception, orientation, memory, or behavior that:

- (1) is listed in the clinical manual of the International Classification of Diseases (ICD-9-CM), current edition, code range 290.0 to 302.99 or 306.0 to 316.0 or the corresponding code in the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders (DSM-MD), current edition, Axes I, II, or III; and
- (2) seriously limits a child's capacity to function in primary aspects of daily living such as personal relations, living arrangements, work, school, and recreation.

"Emotional disturbance" is a generic term and is intended to reflect all categories of disorder described in DSM-MD, current edition as "usually first evident in childhood or adolescence."
