Number States with Unduplicated Counts

39

Note:

This table uses data from URS/DIG Table 2a, Table 2b and from the US Census Bureau.

All denominators use US Census data from 2006.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

Regional groupings of States based on SAMHSA's Block Grant Regions.

* Reported under Hispanic Origin

State Notes:

2A: Age None

Gender None

Race: None

Overall: Data continues to be refined, with data being pulled from 4 independent sources (community mental health, state hospital, children's residential treatment and therapeutic foster care) Data from only 2 of the 6 PRTF facilities data is included.

2B: Age None

Gender None

Race: None

Overall: None

General Notes: North Dakota, FY 2008

| Table Number | General Notes |
|--------------|---|
| 2A & 2B | <p>Data continues to be refined from previous years with data still being pulled from 4 different, independent sources (community mental health database, state hospital data system, children's residential treatment, and therapeutic foster care.) ND's multiple independent data systems, are used for a variety of purposes such as billing, eligibility, progress notes, scheduling, etc., with data collection being one piece. Individuals receiving services by the SMHA do not have a unique identifier across these independent data systems. Each independent system collects client demographic information so unduplicated counts can be achieved; however, unduplicated counts across all systems can be inaccurate and is cumbersome. The ND Department of Human Services continues to work on the development of an overview system to assign a unique client identifier to individual receiving services which will cross all independent data systems. This will enable more accurate data collection and reporting, with the goal of unduplicated counts.</p> |
| 14A & 14B | <p>In the last state fiscal year, an electronic checklist was implemented as a guide to assist case managers with identifying individuals receiving services who meet the definition of serious mental illness. Implementation was 10-24-07 and staff was instructed to complete a form for individuals served beginning 7-1-07. Modifications and changes were made to the electronic clinical documentation and billing system and electronic schedule was also introduced. The implementation process is not complete and ongoing technical assistance is being provided to ensure consistent application of the checklist. Due to this, and the modifications to the electronic health record, the method for retrieving data has been modified from previous years. The checklist data was designed to be used as a means to identify the number of records in the system for adults diagnosed with serious mental illness.</p> |
| 14 & 14B | <p>When the data was retrieved for SFY2008 and compared with SFY2007, there was a decrease of approximately 4000. In attempt to account for the differences, the following areas were investigated and are noted as limitations for the data for SFY2008. - Data retrieved specifically from the checklist showed a decrease of approximately 4000 from the last SFY. - Data was then retrieved, based on program enrollment codes, for individuals with no checklist data who received "SMI services." - Data was also retrieved for individuals with no checklist data, who received "medication only" services, with the assumption that these individuals served have been diagnosed with a serious mental illness. - An estimation of individuals with no checklist data, not receiving "SMI Services," but receiving "acute/outpatient" services was also calculated. This was based off the data from the last state fiscal year for adults diagnosed with serious mental illness who received "acute/outpatient" services. - ND has also embraced the recovery model. With the implementation of transformation activities and recovery concepts, the impact could also be reflected in the data. It is anticipated that the data for the upcoming State Fiscal Year 2009 will serve as a baseline.</p> |
