Note:

US totals are based on states reporting.

This table uses data from URS/DIG Tables 16 and 17

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

T16 Ohio collects the number of persons receiving these EBPs through surveys of providers conducted by 3 different Coordinating Centers of Excellence which provide technical assistance, training and fidelity assessments.

T17 FY2007 count was duplicated inpatient including outpatient count, while 2008 includes only an unduplicated outpatient count. Therefore less number of people are reported this year.

Table Number	General Notes
11	Methodology of collecting data for both Adults and Child surveysTwo different types of surveys are used by Ohio, CQRT and consumer outcomes. Ohio consumer outcome phone survey is self-administered at mental health provider's with assistance if required. Information about Mail surveys is available online at http://mh.state.oh.us/initiatives/outcomes.html . Face to face surveys are conducted by consumer quality review team (CQRT) where consumers conduct face to face interviews with other consumers while Web based surveys are accessible at http://www.namiohio.org/cqrt.html .
9	A Social Connectedness Scale was created from 4 items collected from our Ohio Outcomes System Quality of Life section (for adults only): 1. How do you feel about the amount of friendship in your life? 2. How do you feel about the amount of meaningful activity in your life (such as work, school, volunteer activity, leisure activities)? 3. How do you feel about the way you and your family act toward each other? 4. How often do you have the opportunity to spend time with people you really like? Items 1-3 were answered on this 5-point scale: 1=Terrible, 2=Mostly dissatisfied, 3=Equally satisfied/dissatisfied, 4=Mostly satisfied, 5=Very pleased, 8=Does not apply (for question #3). Item 4 was answered on this 5-point scale: 1=Never, 2= Seldom/rarely, 3=Sometimes, 4=Often, 5=Always.
9	Similar to the MHSIP Social Connectedness scale, Ohio's Social Connectedness scale was computed if the individual had at least 3 of the 4 items. (Preliminary stats on a subsample of the population indicated that 84.2% of cases have all 4 items, another 5.7% have at least 3 items (89.8%); 0.9% have only 1 or 2 items, and 9.2% do not have any of the 4 items). The Reliabilities (Cronbach's alpha) for Ohio's Social Connectedness scale on the subsample were adequate: total sample alpha = .74; alpha's ranged from .73 to .75 by sex to .71 to .75 by race.
9	To Create cut-off scores for reporting in the Block Grant we followed a similar formula as the MHSIP Social Connectedness scale. However, the MHSIP Social Connectedness items are on a 5 point scale with 1 being high - Ohio's Social Connectedness scale is on a 5 point scale with 5 being high. Thus instead of using the MHSIP cutoff score of 2.5 Ohio's cutoff score is 3.5, however they represent the same relative value.
14A	SMD (adults) & SED (children) definitions: Ohio Administrative Code 5122-24-01 Certification definitions (B) Applicability (82) "Person with serious emotional disturbance" means a person less than eighteen years of age who meets the department's 508K certification criteria, which is a combination of duration of impairment, intensity of impairment and diagnosis. The following criteria are used in the certification process: (a) Criteria: (i) Under eighteen years of age; (ii) Marked to severe emotional/behavioral impairment; (iii) Impairment that seriously disrupts family or interpersonal relationships; and (iv) May require the services of other youth-serving systems (e.g., education, human services, juvenile court, health, mental health/mental retardation, youth services, and others). (b) Marked-to-severe behavioral impairment is defined as impairment that is at or greater than the level implied by any of the following criteria in most social areas of functioning:
14A	(i) Inability or unwillingness to cooperate or participate in self-care activities; (ii) Suicidal preoccupation or rumination with or without lethal intent; (iii) School refusal and other anxieties or more severe withdrawal and isolation; (iv) Obsessive rituals, frequent anxiety attacks, or major conversion symptoms; (v) Frequent episodes of aggressive or other antisocial behavior, either mild with some preservation in social relationships or more severe requiring considerable constant supervision; and (vi) Impairment so severe as to preclude observation of social functioning or assessment of symptoms related to anxiety (e.g., severe depression or psychosis). (c) An impairment that seriously disrupts family or interpersonal relationships is defined as one: (i) Requiring assistance or intervention by police, courts, educational system, mental health system, social service, human services, and/or children's services; (ii) Preventing participation in age-appropriate activities; (iii) In which community (home, school, peers) is unable to tolerate behavior; or (iv) In which behavior is life-threatening (e.g., suicidal, homicidal, or otherwise pot
