Note:
This table uses data from URS/DIG Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2008

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS/DIG Table 3.

This table uses data from URS/DIG Table3 and 6.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data for URS/DIG Table 4a.

California

URS Table Number	General Notes
All Tables	County reporting continues to cause significant shortfalls for URS reporting. California is working with counties to improve reporting.
2, 5	California's data system allows Hispanic/Latino origin to "trump" race data to get an unduplicated count of persons served, making it impossible to identify all consumers by hispanic/latino origin.
11	Because a point-in-time methodology was used, calculation of confidence intervals is not really indicated. When calculated, the confidence intervals were < 1% due to large samples and have been rounded up. Reported percentages reflect sample values +/-1%.
