* Reported under Hispanic Origin.

Note:

Are Client Counts Unduplicated? Unduplicated Number of States with Unduplicated Counts 44

This table uses data from URS/DIG Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2008

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 2a

Age May be duplication between persons served in DMHAS and DCF systems for persons age 18 to 21 years old.
Gender None
Race For DMHAS, 81.3% (8,470) of "Race Not Available" represents clients race as "Other".
Overall Unduplicated count for adults is across DMHAS system.

Table 2b

Age May be duplication between persons served in DMHAS and DCF systems for persons age 18 to 21 years old.
Gender None
Race For DMHAS, 81.3% (8,470) of "Race Not Available" represents clients' race as "Other".
Overall Unduplicated count for adults is across DMHAS system.

Note:

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data for URS/DIG Table 4a.

State Notes:

Deferred Diagnosis = 38.3% (19,719) of 51,535

Connecticut

URS Table Number	General Notes
08	MHA activities other than those listed include: Connecticut's five Regional Mental Health Boards (RMHBs) represent the Adult State Mental Health Planning Council at the sub-state /regional level providing program evaluation, planning and needs assessment to the Council and Connecticut DMHAS.
08	MHA Technical Assistance and Planning Council Activities: DCF: Expenditures of the Children's Behavioral Health Advisory Council.
11	Methodology of Collecting Adult Survey Data: The data was handed out and self-administered.
12	DMHAS: The percent of adults meeting the federal definition of SMI is based upon individuals served in State-operated programs and PNP providers in the community, with a diagnosis code 295, 296, or specified 297 or 298.
12	DCF calculates the number of children with co-occurring disorders by dividing the number of children with SA related diagnosis by the total served in community-based programs.
12	How DMHAS calculates and counts the number of adults with co-occurring disorders: adult consumers active in MH programs during the reporting period who have had a SA diagnosis either during their MH treatment or in the year prior to their admission to MH treatment.
12	Plans for unduplication: DMHAS has a unique identifier and reports unduplicated figures across community-based and inpatient services. DCF has duplicated across state hospital and community programs and within community programs for part of the report period. DCF has entered a contract with the Corporation on Standards and Outcomes to develop an enhanced, web-based behavioral health information system. As of July 1, 2009, DCF required an unduplicated case count through use of the client name as the unique identifier for all contract providers to assure non-duplication after this date.
14 A and B	For adults, data are missing for 38.5% (19,269) of persons served with a deferred diagnosis.
14 A and B	SMI: DMHAS uses only diagnosis to determine SMI and does not include level of functioning.
14 A and B	Diagnosis in SMI Definition: Diagnosis Code of 295 and 296.
16	FFT Fidelity measure used: adherence information are all recorded on the web-based FFT Client Services System. In accordance with FFT Protocol, Connecticut's agency monitors fidelity through the clinical lead. Fidelity is also monitored on an ongoing basis by FFT, Inc. through a variety of measures, including the national supervisor who monitors our site. FFT fidelity is measured weekly by the on-site clinical lead and monthly by FFT, Inc. through Connecticut's national consultant.
16	Therapist Adherence Measures (TAM), Supervisory Adherence Measures(SAM) and Program Implementation Reports(PIR) are used to measure MST fidelity. Advanced Behavioral Health, Inc is a vender used to Measure MST fidelity weekly and monthly.
16	Data are not collected at the client-level, but at the program level. The supported employment data and SMI data are in separate databases. The supported employment data is hand counted and demographics are not recorded. DMHAS cannot separate out persons receiving Supported Employment EBP service by SMI and non-SMI.
16	Total Unduplicated Adults with SMI: DMHAS uses only diagnosis to determine SMI and does not include level of functioning.
16	Total Unduplicated Adults: Diagnosis in SMI Definition: Diagnosis Code of 295 and 296.
16	Supported Housing EBP: Data for Clients receiving Supportive Housing services. Could include SMI and non-SMI clients.
16	Supported Employment: Data for Clients receiving Supportive Employment services. Could include SMI and non-SMI clients.
17	Integrated Treatment for Co-Occurring Disorders (MH/SA): Data for Clients receiving EBP IDDT Treatment for Persons with SMI and SA disorders.

URS Table Number	General Notes
20 A and B	DMHAS: Adult discharges are in CY 2008 and readmissions are from January 1, 2008 through June 30, 2009.
