Note:
This table uses data from URS/DIG Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2008

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS/DIG Table 3.

This table uses data from URS/DIG Table3 and 6.

Note:

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data for URS/DIG Table 4a.

State Notes:

These totals will not equal the totals from table 4 due to the inclusion of children aged 0-17 in the diagnosis categories that were not included in table 4. This age group will be removed from this report next year so that totals will match.

Florida

URS Table Number	General Notes
10	Florida is unable to provide this information due to changes and streamlining of the budget reporting system. The state is working on a way to get data from the local offices for the 2010 round of reporting.
15	These totals are greater than the totals on 2A because a person can be in more than one setting during the year. Florida is unable to differentiate between residential and children's residential. All children in residential will be counted under the residential care column.
