URS Table Number	General Notes
All	Unless otherwise specified, data in all tables includes consumers served in the following settings: State hospital inpatient stays in Adult Mental Health, Secure, and Child/Adolescent Short-Term Mental Health programs. Data for hospital outpatients and non-admits (including 23-hour observation) is not included; however, hospital-operated community services are included with other community services; Authorizations for residential stays in Psychiatric Residential Treatment Facilities (PRTFs); Authorizations for community services for consumers having at least one authorization with Primary or Secondary Diagnostic Category of MH; Counts are unduplicated across settings where such data is combined.

(State hospital inpatient services are not eligible for Medicaid reimbursement.) 9, 11	Survey data includes community consumers only.
12, 14A, 14B, 16, 17	Community consumers may receive authorization for a core bundle of services using a simplified authorization request type "Registration." On these authorization requests consumers were assigned a diagnostic category of "Mental Health," but they were not assigned specific DSM diagnoses; therefore, consumers whose only request type was Registration cannot be designated as SMI or SED. This yields reported counts and percentages of SMI/SED consumers that are artificially low. There were 33,649 consumers having only Registrations, accounting for 22% of all consumers reported in Tables 2A/2B. These consumers could not be included in: Table 12.2 (SMI-SED percentages of total served); Table 12.3b1-2 (SMI-SED percentages with co-occurring substance abuse); Tables 14A/14B (total SMI-SED consumers served); Table 16 (SMI-SED consumers receiving specified services); Table and 17 (SMI consumers receiving specified services).
