Note:
This table uses data from URS/DIG Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2008

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

Kansas

URS Table Number	General Notes
4 & 4A	Employment status is collected for all KS adult mental health consumers at admission. Monthly updates to employment status are collected for adults with SPMI while they are receiving specialized services. Totals represent the employment status of consumers admitted or updated during FY09.
15	Living situation is collected for all KS mental health consumers at admission. Monthly updates to living situation are collected only for adults with SPMI and children with SED while they are receiving specialized services.
16	The amounts reported for Supported Employment represent those consumers that have received services based on broadly defined federal guidelines. Kansas collects data on a subset of the population receiving Supported Employment Services from CMHC staff trained using the Dartmouth toolkit and monitored for fidelity through a contract between SRS/Mental Health and the University of Kansas. For FY2009, there were 1,265 adults with SPMI who received Supported Employment Services following this monitoring protocol. This represents 52.4% of all consumers receiving Supported Employment Services during FY09 and 13.4% of the total SPMI population.
16	The amounts reported for Supported Housing Services represent those consumers that have received services based on broadly defined federal guidelines. The Kansas SRS/Mental Health Department conducted Supported Housing training in 2006 and 2007 through a contract with the University of Kansas. Although the SAMHSA EBP Toolkit is not published at this time, SRS/Mental Health, together with various stakeholders throughout the state, set out to develop our own Supported Housing toolkit which will include a fidelity scale with ongoing progress occurring in fiscal year 2010.
17	The amounts reported for Integrated Treatment for Co-occurring Disorders (MH/SA) represent those adult consumers that have received services based on broadly defined federal guidelines. Kansas collects data on a subset of the population receiving Integrated Treatment for Co-occurring Disorders from CMHC staff trained using the Dartmouth toolkit and monitored for fidelity through a contract between SRS/Mental Health and the University of Kansas. For FY2009, there were 724 adults with SPMI who received Integrated Treatment for Co-occurring Disorders following this monitoring protocol. This represents 33.9% of all consumers who receiving Integrated Treatment for Co-occurring Disorders during FY09 and 7.7% of the total SPMI population.
