URS Table Number	General Notes
11	These surveys are administered using a convenience sampling method; it is conducted in the clinics for people showing up for appointments over a 3 week period. This contributes to our high 'response rate.' We are discussing future use of a different methodology that is more statistically sound. When that change is made, our response rate will likely be reduced.
14	State Definition of Adults with SMI: 1. As defined in KRS 210.005, "chronic" (mental illness) means that clinically significant symptoms of mental illness have persisted in the individual for a continuous period of at least two (2) years, or that the individual is presently and significantly impaired in his ability to function socially or occupationally or both; and 2. Have a diagnosis of a major mental disorder (other than substance abuse or mental retardation as the sole diagnosis) as included in the DSM-III-R classification under Schizophrenic Disorder, Psychotic Disorders, Mood Disorder, Organic Mental Disorders or Delusional (paranoid) Disorders. Personality disorders shall be considered only when information and history depict that the individual exhibits persistent disability and significant impairment in major areas of community living.
14	State Definition of Children with SED: 1. A child who is under age 18 or under age 21 and was receiving mental health services prior to age 18 and the services must be continued for therapeutic benefit; and 2.
