Note:

Are Client Counts Unduplicated? Unduplicated Number of States with Unduplicated Counts 44

This table uses data from URS/DIG Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2008

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 2a

Age None
Gender None
Race There were 638 consumers in the category of Hawaiian or other Pacific Islander. Our data system has this category combined with simply "Other." Because there is no "Other" category in the URS all of them have been listed under "race not available."
Overall None

Note:
This table uses data from URS/DIG Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2008

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS/DIG Table 3.

This table uses data from URS/DIG Table3 and 6.

Forensics included in "non forensic" data? No

Note:

US totals are based on states reporting.

This table uses data from URS/DIG Table 20.

State Notes:

State Hospital readmissions dropped from 2008 to 2009 because of several interventions. First, there are five community liaison officers statewide dedicated to assisting discharged clients to reintegrate into communities. Second, the legislature approved a million dollar fund to assist in any way necessary to ensure a stable reintegration for clients into community mental health settings. Third, coordination efforts between the hospital and community mental health services are monitored closely for efficiency and thoroughness.

Montana

URS Table Number	General Notes
5A	There was an increase in providers for the state mental health program, resulting in an increase both in overall number served and in particular those with both Medicaid and state funding.
11	Sampling methodology changed for 2009 survey. A higher percentage of individuals with moderate, versus severe, disability were sampled, increasing some of the domain scores of satisfaction.
12	2008 prevalence of dual diagnosis was obtained by client level data submitted by mental health centers indicating how many individuals screened positive for co-occurring based on brief screening tool. 2009 prevalence was based on the number of claim recipients with an actual diagnosis of co-occurring CD.
20A	State Hospital readmissions dropped from 2008 to 2009 because of several interventions. First, there are five community liaison officers statewide dedicated to assisting discharged clients to reintegrate into communities. Second, the legislature approved a million dollar fund to assist in any way necessary to ensure a stable reintegration for clients into community mental health settings. Third, coordination efforts between the hospital and community mental health services are monitored closely for efficiency and thoroughness.
