Note:

Are Client Counts Unduplicated? Unduplicated Number of States with Unduplicated Counts 44

This table uses data from URS/DIG Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2008

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 2a

Age The age was calculated as follows: [(July 1, 2008– (Consumer Birth Date)) / 365.25]
 Gender If multiple genders listed, the most frequent gender was reported.
 Race For race listed as "Other", reported in "More than one race reported".
 Overall See General Notes.

Table 2b

Age The age was calculated as follows: [(July 1, 2008– (Consumer Birth Date)) / 365.25]
 Gender If multiple genders listed, the most frequent gender was reported.
 Race None
 Overall See General Notes

Note:
This table uses data from URS/DIG Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2008

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS/DIG Table 3.

This table uses data from URS/DIG Table3 and 6.

Forensics included in "non forensic" data? No

Note:

US totals are based on states reporting.

This table uses data from URS/DIG Table 20.

State Notes:

This table includes all persons discharged from a state psychiatric hospital between 7/1/08-6/30/09, that were not admitted to or discharged from a forensic unit. The total number of discharges includes individuals treated at the state psychiatric hospitals only for substance abuse disorders, as well as individuals treated for both substance abuse and mental health disorders and those treated for mental health disorders only. Transfers between different state psychiatric hospitals are not counted as discharges. A discharge is counted if the person has been discharged for more than seven days without a readmission, and if the discharge status does not indicate a transfer. Readmissions are counted if they occurred greater than seven days after a discharge, and if the discharge status does not indicate a transfer.

URS Table Number	General Notes
All	In January 2009, the Division of Behavioral Health cleaned its data system by administratively discharging nearly 18,000 records of admission to program prior to November 2003 and of which had no activity in the last year. This reduced the number of active cases in the system.
All	To obtain unduplicated count of persons served, the Division used social security numbers and dates of birth to identify unique clients in the data system. In January 2009, the Division of Behavioral Health cleaned its data system by administratively discharging nearly 18,000 records of admission to program prior to November 2003 and of which had no activity in the last year. This reduced the number of active cases in the system.
2A	Data for this table were extracted from the Data Integration Grant (DIG) Database. The DIG Database is a collection of data from several different databases. The databases included in DIG are Magellan 2003, Magellan 2004, Magellan 2009, AIMS, and Avatar. The two Magellan databases hold collections of Community Based Data for Nebraska. The AIMS/Avatar database represents consumers served in one (or more) of the state's three regional centers. The DIG database contains Information about Mental Health, Dual Diagnosis, and Substance Abuse consumers.
2A	From the DIG database, Records for Mental Health and Dual Diagnosis Consumers are extracted. Mental Health Consumer records are included in this population when they meet one of three criteria: 1) Having a DSM-IV Axis 1 number which complies with a Mental Health Diagnosis or, 2) Having a Service Authorization for a Mental Health Treatment Program or, 3) Having a final outcome for Mental Health reasons or, 4) Having a Mental Health Reason for Admission or, 5) Meets the State definition for SMI/SED
2A	Consumers only being served for Substance Abuse or Mental Retardation/Developmental Disabilities are excluded from this population. These are not persons with Dual Diagnosis. They are people with a primary diagnosis of substance abuse. The population used for Table 2a is an unduplicated count of persons served in both regional centers and community programs. The clients were identified by social security number and date of birth.
2B	This is the same population presented in Table 2A distributed by ethnicity.
3	Data in this table reflects a population which receives Mental Health Services in one of four settings. This table contains data which are duplicated across service settings. Community Mental Health Programs includes clients receiving outpatient services at a State Regional Mental Health Center or clients receiving services at a community provider. State Psychiatric Hospitals include Adults admitted to an inpatient unit and Adolescents admitted to either a sex offender unit or a chemical dependency unit at a State Regional Mental Health Center. Other Psychiatric Inpatients include clients admitted to one of the psychiatric inpatient hospitals within Nebraska, other than a State Regional Mental Health Center. Residential Treatment Center for Children population consists of adolescents admitted to one of the psychiatric units at a State Psychiatric Hospital; otherwise they were classified in State Psychiatric Hospitals if admitted to a sex offender or chemical dependency unit. Age was calculated as follows: $[(\text{July 1, 2008} - (\text{Consumer Birth Date})) / 365.25]$
4	This table is a representation of the adult population first presented in Table 2a. Employment Status is based on most recent admission data, if more than one. If employment status was listed as unknown or was missing, employment status at discharge, if available, was used.
4A	This represents the same population as in Table 4. Primary diagnosis could not be determined, due to the nature of the database (i.e. several diagnoses at admission, with no clear identification of primary diagnosis). As an alternative, a hierarchal approach was used where the most frequent diagnosis of schizophrenia, bipolar and mood disorders, and other psychiatric diagnostic combinations was applied. Those individuals who did not fall into one of those three categories, were placed in "all other diagnoses" if other mental health diagnostic codes were listed (Axis codes between 290-316, minus substance abuse codes). The remainder of the population was classified as "No Diagnosis and Deferred" if an appropriate code was listed (799.9 or V71.09) or no diagnosis was given at all.
5A	The Population for Table 5a is the same population represented in Table 2A. The distribution of patients was defined as follows: Medicaid Only: persons listed as eligible and receiving payments, without another source of medical insurance. Non-Medicaid Only: persons listed as having a non-Medicaid source of insurance. Both Medicaid and Non-Medicaid: Persons listed as eligible and receiving payments from Medicaid, that have another source of medical insurance. Medicaid Status Not Available: all persons not listed as having Medicaid or another source of medical insurance.
5B	This is the same population as presented in Table 5A distributed by ethnicity.

URS Table Number	General Notes
06	<p>This table represents the turnover of the clients shown in Table 2A. Total Served at Beginning of Year (unduplicated): This population includes clients with admission dates before July 1, 2007 and who were discharged after July 1, 2007, or were not discharged. To unduplicate clients, a hierarchical method was applied so that a person could only be listed in one type of service program on July 1, 2007. Hierarchy structure: (1) State Hospitals (Currently admitted); (2) Residential Treatment Centers for Children (Currently admitted, but not concurrently admitted to a State Hospital); (3) Other Psychiatric Inpatient (Currently admitted, but not concurrently admitted to a State Hospital or RTC for Children); (4) Community Programs (Currently admitted, but concurrently not admitted to any of the above programs). Admissions During the Year (duplicated), the population was limited to records with admission date which occurred between July 1, 2007 and June 30, 2008. Each admission to one of the service types was only counted once, however, a person could be admitted to more than one service type. Discharges During the year (duplicated), the population was limited to records with discharge date which occurred between July 1, 2007 and June 30, 2008. Persons that were discharged and readmitted within 7 days were not considered actual discharges and were not counted (i.e. Transfers). Each actual discharge from one of the service types was only counted once, however, a person could be discharged from more than one service type. Length of Stay (in Days): Discharged Patients, the population was limited to those persons included in the previous column. Mean and Median number of days was calculated by subtracting the Admission date from the Discharge date of each record. For Clients in Facility for Less than 1 Year: Average Length of Stay (in Days): Residents at end of year, the population was limited to persons who were admitted and were not discharged and had been in treatment for less than 365 days (calculated as follows {June 30, 2008-Admission Date}). For Clients in Facility More than 1 Year: Average Length of Stay (in Days): Residents at end of year, the population was limited to persons who were admitted and were not discharged and had been in treatment for more than 365 days (calculated as follows {June 30, 2008-Admission Date}).</p>
9, 11, 11a	<p>The Division of Behavioral Health contracts with the NE DHHS Division of Public Health Data Management Unit for annual consumer survey data collection using Federal Mental Health Data Infrastructure Grant funds. Data analysis and reporting completed by DHHS-Operations/Financial Services - Research & Performance Measurement funded by NE DHHS. The data are reported under: Table 9: SAMHSA NOMs: Social Connectedness and Improved Functioning, Table 11: Summary Profile of Client Evaluation of Care, and Table 11a: Consumer Evaluation of Care by Consumer Characteristics: (Optional Table by Race/Ethnicity.)</p>
12	<p>Percentage of adults served by the SMHA who also have a diagnosis of substance abuse problems represents adults (18 years old and greater) in the population served by the SMHA who also have a diagnosis of Substance Abuse divided by the total number of Adults in the population. A Person with a Substance Abuse Diagnosis is defined as someone who: (1) Has a DSM-IV Axis I number which complies with a Substance Abuse Diagnosis (291.1-292.99 and 303.0-305.99) or (2) Has a Service Authorization for a Substance Abuse Program or (3) Has a Substance Abuse Related "Reason for Admission" or (4) Has a final outcome relating to Substance Abuse or (5) Was seen at a provider that provides care only for Substance Abuse disorders. Percentage of children/adolescents served by the SMHA who also have a diagnosis of substance abuse problems represents children/adolescents (less than 18 years of age) in the population served by SMHA who also have a diagnosis of Substance Abuse divided by the total number of children/adolescents in the population.</p>
12	<p>Percentage of adults meeting Federal definition of SMI who also have a diagnosis of substance abuse problems represents adults (18 years old and greater) in the population who meet the Federal definition for SMI, who have a diagnosis of Substance Abuse problem divided by the total number of adults with SMI in the population (Table 14A). Percentage of children/adolescents meeting Federal definition of SED who also have a diagnosis of substance abuse problems represents children/adolescents (less than 18 years of age) in the population who meet the Federal definition for SED, who have a diagnosed Substance Abuse problem divided by the total number of children/adolescents with SED in the population (Table 14A).</p>
14A	<p>This table represents the distribution of the adult SMI and children/adolescent SED population. This population is a subset of the population presented in Table 2A. NE State SMI Definition: An Axis diagnosis codes between 295-298.9 AND GAF score= 0-59 OR SSI/SSDI eligible OR Income Source = SSI or SSDI OR were admitted to a Community Mental Health Rehabilitation Based Services: Community Support, Assertive Community Treatment, Psychiatric Residential Rehabilitation, Day Treatment, Day Rehabilitation, Day Support, Vocational Support, or related psychiatric rehabilitation services. NE State SED Definition: Age 3-17 AND One of the following Axis diagnosis codes 314.00, 314.01, 314.9, 295.xx, 295.4, 295.7, 297.1, 297.3, 298.8, 298.9, 296.0x, 296.4x, 296.5x, 296.6x, 296.7, 296.80, 296.89, 296.90, 301.13, 296.2x, 296.3x, 300.01, 300.21, 300.30, 307.1, 307.51, 309.81, 312.34, 307.23 AND SSI/SSDI eligible OR Income Source = SSI or SSDI OR were admitted to one of the following programs: Professional Partner Services, Special Education Services, Day Treatment MH, Intensive OP – MH, Therapeutic Consultation/School Wrap, Respite Care – MH</p>
14B	<p>This is the same population as presented in Table 14A distributed by ethnicity.</p>

URS Table Number	General Notes
15	Living Situation information is based upon Self-Report Data collected at the time of the most recent admission (if more than one). Children's Residential Treatment is not recorded in the database. This field was populated by adolescents listed as living in an Institutional Setting that also met the requirements to be considered receiving treatment in a Children's Residential Treatment Center (see Table 3). Living status based on living status at time of most recent admission, if more than one. If living status at admission was unknown, then living status at discharge was used if known.
16	Receiving Supported Housing - the data are unduplicated count of persons served under the Nebraska Housing Related Assistance Program, using data reported by the six Regional Behavioral Health Authorities. Receiving Supported Employment - reported directly to Nebraska Division of Behavioral Health from the Administrative Services Only Managed Care Contractor, Magellan Health Services as an ad hoc report. Receiving Assertive Community Treatment (ACT) was reported directly to Nebraska Division of Behavioral Health from the ACT data base as an ad hoc report. Adults with SMI served is the same adult population found in Table 14A. Children with SED is the same child/adolescent population found in Table 14a. No data collected for Table 16 for the youth EBPs.
17	Receiving Integrated Treatment for Co-occurring Disorders (MH/SA) represents individuals listed as receiving treatment in a dual-diagnosis program based on services authorized, admission reason, and level of care. Receiving Medication Management represents individuals listed as receiving medication management in services authorized, or level of care.
20A	This table includes all persons discharged from a state psychiatric hospital between 7/1/08-6/30/09, that were not admitted to or discharged from a forensic unit. The total number of discharges includes individuals treated at the state psychiatric hospitals only for substance abuse disorders, as well as individuals treated for both substance abuse and mental health disorders and those treated for mental health disorders only. Transfers between different state psychiatric hospitals are not counted as discharges. A discharge is counted if the person has been discharged for more than seven days without a readmission, and if the discharge status does not indicate a transfer. Readmissions are counted if they occurred greater than seven days after a discharge, and if the discharge status does not indicate a transfer.
20B	This table includes all persons discharged from a state psychiatric hospital between 7/1/08-6/30/09 that were admitted to or discharged from a forensic unit. Transfers between different state psychiatric hospitals are not counted as discharges. A discharge is counted if the person has been discharged for more than seven days without a readmission, and if the discharge status does not indicate a transfer. Readmissions are counted if they occurred greater than seven days after a discharge, and if the discharge status does not indicate a transfer.
21	This table includes all persons discharged from a state psychiatric hospital or a psychiatric inpatient hospital between 7/1/08-6/30/09, that were not admitted to or discharged from a forensic unit. The total number of discharges includes individuals treated only for substance abuse disorders, as well as individuals treated for both substance abuse and mental health disorders and those treated for mental health disorders only. Transfers are not counted as discharges. A discharge is counted if the person has been discharged for more than seven days without a readmission, and if the discharge status does not indicate a transfer. Readmissions are counted if they occurred greater than seven days after a discharge, and if the discharge status does not indicate a transfer.
