Arkansas

URS Table Number	General Notes
5A/B	Payor source is defined as the "First Payor Billed," which in the case of Medicaid is also usually the ultimate payor for the service. "Medicaid (only Medicaid)" is an unduplicated count of those for whom Medicaid was the First Payor Billed for the last service provided during the state fiscal year. "Non-Medicaid Sources (only)" is an unduplicated count of those for whom some payor source other than Medicaid was the First Payor Billed for the last service provided during the state fiscal year.
6	The 2015 Total Admissions to State Hospital During the Year counted every person seen by the Arkansas State Hospital, including those with a LOS of zero day, that were not actually admitted. Removing the LOS zero day, non-admitted, patients for 2015 results in 589 admissions to the State Hospital.
12	The overall increase of SMI, SED, and co-occurring diagnoses appears to be a result of more accurate data collection.
14A	The overall increase of SMI, SED, and co-occurring diagnoses appears to be a result of more accurate data collection. With the overall number of consumers increasing, all of the subcategories would be expected to increase. The proportion of each of the categories remains about the same.
15	Providers are not required to update this status at defined intervals, only when it changes. These changes are collected on an ongoing basis as an attribute of transactions which are the substrate upon which URS reporting is based.
16 & 17	Data on EBPs is based on aggregate data reports from providers. Client level data on EBPs is not reported, the number served is not unduplicated and breakouts of demographic variables are not reported. For SMI/SED client level data is reported, the count is unduplicated and the demographic break outs are reported in tables 14A and 14B.
16	The overall increase of SMI and SED appears to be a result of more accurate data collection. The increase in Supported Employment Services is a result of one facility increasing the number of patients from 122 in 2015 to 286 in 2016. The decrease in the number of ACT services is a result of one facility stopping seeing patients and two other facilities seeing a reduction in the number of patients in 2016. The increase in MST Services is due to the only facility that practices MST increasing the number of patients from 29 in 2015 to 143 in 2016. This is an EBP program that we suspect received licensure towards the end of SFY 2015.
17	The increase in Total number of consumers receiving Family Psychoeducation services is a result of one facility increasing the number of patients from 37 in 2015 to 243 in 2016. This is an EBP program that we suspect received licensure towards the end of SFY 2015. The decrease in Medication Management Services is a result of one facility seeing 23 patients in 2015 and zero in 2016.
