Note:

Are Client Counts Unduplicated? Duplicated between Hospitals and Community **Number of States with Unduplicated Counts** 43

This table uses data from URS Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2015

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 2a

Age None
Gender None
Race Hispanic - State Hospitals only
Overall California's Client and Services Information system currently does not capture pregnancy status

Table 2b

Age None
Gender None
Race State Hospitals collects Hispanic as a racial category and do not use a separate question for ethnicity
Overall None

California

URS Table Number	General Notes
5A	One of our large counties is in the process of switching to a new electronic health systems and is running two parallel systems. They have not yet aligned data submission from their new system to our departmental Client Services Information (CSI) data system. They are currently working on including records from the new system into the CSI submission process but will not do so in time for the 2016 URS tables. Relatedly, our department is instituting a comprehensive, statewide, two-year project to improve the completeness and validity of the CSI data system.
11	Sample size/response rate: for adult and child family surveys, the number of surveys attempted, the number of contacts made, and response rate are not available.
16	The increase in total number of consumers receiving Supported Housing services is a result of one agency increasing the number of consumers receiving Supported Housing Services by 29% and a county doubling the number of agencies providing Supported Housing Services from 15 to 30. Also, the Mental Health Service Act Housing Program has enriched housing opportunities and support services generally.
17	Three counties accounted primarily for the increase in Family Psychoeducation Services. Collectively, they increased the number of consumers receiving services by 60% from 350 to 559.
19A/B	Total number of people from which the sample was drawn, sample size, number of survey Contacts were made and response rate data are not available.
