\* Reported under Hispanic Ethnicity.

Forensics included in "non forensic" data? No

### Note:

US totals are based on states reporting.

This table uses data from URS Tables 20a and 20b.

### State Notes:

Discharges include persons admitted to CMHIFL for ECT & discharged the next day and exclude same day ECT's at CMHIP. ECT-only patients are excluded from 30 & 180 day readmissions for both Institutes.

\* Reported under Hispanic Ethnicity.

Forensics included in "non forensic" data? No

**Note:**

US totals are based on states reporting.

This table uses data from URS Tables 20a and 20b.

**State Notes:**

Discharges include persons admitted to CMHIFL for ECT & discharged the next day and exclude same day ECT's at CMHIP. ECT-only patients are excluded from 30 & 180 day readmissions for both Institutes.

**Structure Domain: Federal Mental Health Block Grant Expenditures for Non-Direct Service Activities, FY 2016**  
**Colorado**

Service	Non-Direct Block Grant Expenditures	% Total	US % Total
Technical Assistance Activities	\$3,799	1.0%	30.1%
Planning Council	\$23,982	6.3%	4.3%
Administration	\$344,547	90.7%	25.8%
Data Collection/Reporting	\$7,747	2.0%	9.4%
Other Activities	-	-	30.4%
<b>Total</b>	<b>\$380,075</b>	<b>100.0%</b>	<b>100.0%</b>

Note: This table use data from URS Table 8.

**State Notes:**

None

**STRUCTURE DOMAIN: State Mental Health Agency Controlled Expenditures for Mental Health, FY 2015****STATE Colorado**

	<b>Expenditures: State</b>	<b>Percent of Total Expenditures: State</b>	<b>Expenditures: U.S.</b>	<b>Percent of Total Expenditures: U.S.</b>
State Hospitals-Inpatient	\$128,600,000	15%	\$8,340,684,868	22%
Other 24-Hour Care	\$358,925	0%	\$6,326,751,257	17%
Ambulatory/Community	\$721,986,811	84%	\$22,187,984,421	59%
Total	\$856,280,541	-	\$37,767,897,721	-

**Note:**

Other 24-Hour Care includes state psychiatric hospital and community based other 24-hour as well as community based inpatient expenditures.

Ambulatory/Community includes expenditures for less than 24-hour care services provided at state psychiatric hospitals. It excludes community based other-24 hour and community based inpatient expenditures.

Total also includes additional SMHA Expenditures for research, training, administration, and other central and regional office expenditures.

Data from NRI's Funding Sources and Expenditures of State Mental Health Agencies, FY 2015 reports - Table 18 "SMHA-Controlled Expenditures for Mental Health Services."

U.S. totals are based on 50 states reporting.

More information on the State Mental Health Agency's Revenues & Expenditures as well as State Footnotes can be found on the NRI website:

## Colorado

URS Table Number	General Notes
4	In 2016 IPS (Employment Specialist Programs) were fully trained and implemented in 10 of the large CMHCs. In 2015, these were not fully operational. Furthermore, the statewide economy has added quite a few jobs to the market in the last fiscal year ( <a href="http://www.denverpost.com/2016/07/22/colorado-june-job-growth/">http://www.denverpost.com/2016/07/22/colorado-june-job-growth/</a> ).
6, 20A/B	Included: persons admitted to CMHIFL (civil state hospital) for ECT & discharged the next day. Excluded: persons who receive ECT at CMHIP (forensic state hospital) the same day.
9	Given the change in sampling methodology, OBH feels the decrease in positive responses for Social Connectedness and Functioning among adults and youth can be attributed to the lower number of completed surveys compared to recent years.
9,11/11A, 19A/B	Starting in FY2015, Colorado's Office of Behavioral Health (OBH) and Colorado's Department of Health Care Policy & Financing (HCPF) collaborated on a consumer satisfaction survey for behavioral health clients in Colorado. This collaboration was in part the desire to streamline State services and reduce the survey burden on the behavioral health population. This collaboration resulted in the creation of a new survey instrument that included various items from the MHSIP and YSS-F/YSS surveys, as well as other survey questions that were aligned/cross walked with the MHSIP /YSS-F questions to ensure capture of MHSIP/YSS-F domains (i.e., Access, Satisfaction, etc.) With this new survey, the methodology changed considerably. Since 2009, OBH had used a convenience sample of current clients for data collection. For FY2015 and FY2016, a third-party research firm was hired by HCPF to complete the survey which consisted of a stratified, random sample of OBH clients who received one or more services in the reporting period. Surveys were mailed to the identified clients and follow-up with computer-assisted phone interviews. This change in methodology reduced the number of completed surveys received, but also provided OBH and HCPF the opportunity to receive feedback from individuals who might not currently be in treatment, which has been a limitation of the MHSIP/YSS-F in years past. Response rate declined in FY2016 due to the following issues: No language flag indicating member's preferred language (English or Spanish); therefore, all non-Medicaid sampled members receive an English version of the survey; Missing phone numbers for all members; Bad addresses/Duplicate addresses; Duplicate member records in the sample frame file (i.e., same client-unique ID and name).
11	Given the change in sampling methodology, OBH feels the increase in positive responses across all domains among both adults and youth can be attributed to the survey sample including clients who completed treatment. Clients who have successfully completed treatment might report more positively than ongoing clients.
11A	Given the change in sampling methodology, OBH feels the decrease in positive responses across races and Hispanic ethnicity among adults and youth can be attributed to the lower number of completed surveys compared to recent years. For FY2016, there appears to be a lack of data from "Native Hawaiian or Other Pacific Islander" participants. We reviewed our data and found that in addition to the lower response rate, all participants who selected "Native Hawaiian or Other Pacific Islander" also selected another race and are thus found in the "More than One Race Reported" category.
12	Co-occurring: With the shift from ICD-9 to ICD-10 we lost the ability to best capture co-occurring in a methodology that was similar to previous years reporting. We hope with next year's data we will have a better baseline of those with co-occurring as we saw in previous years. We do not anticipate the drop of those served with co-occurring to reflect a change in our population or the service opportunities to co-occurring clients. We also still have a bifurcated MH and SUD reporting tool, and we are designing a new system for FY18. We hope this system will also alleviate data noise for future reporting years.
15A	While increase in total number served, the numbers are still similar to last year because more persons were served across the spectrum; furthermore, clients with SMI/SED were usually covered on most Medicaid plans before ACA
16 & 17	Our current mental health outcomes data tool does not collect EBP service information. For this data, we have a separate data collection methodology, which has less stringent data validations and data cleaning. Therefore, the EBP tables will allow for missing data which the other tables do not have. These two methodologies make the comparison/validation in the 'missing' categories not appropriate for these tables. With the new integrated data tool, CO is looking to combine these data collection efforts to ensure better data quality in the future.
19A	Given the change in sampling methodology, OBH feels the decrease in overall criminal justice involvement in adults and youth can be attributed to the lower number of completed surveys compared to recent years.
19B	Given the change in sampling methodology, OBH feels the decrease in overall school attendance in youth can be attributed to the lower number of completed surveys compared to recent years.
21	Colorado does not have psychiatric units other than those reported in tables 20a/b
