URS Table Number	General Notes
4	The decreases in total number of consumers employed and unemployment as well as the increase in not in labor force were due to decrease of clients in our registry and also more clients now unemployed or not in labor force due to their status. These are mentally ill challenged cases and once they're active and violent, they cannot be forced to work.
5A	The decrease in Medicaid data is due to these clients receiving both Medicaid and Non-Medicaid payments. These patients will never pay for any services provided to them at our local hospital. They will be treated equally like any disabled individuals in the FSM. No charge to any services provided to them.
