Indiana

URS Table Number	General Notes
6	There is a difference between total served at the beginning of year and admissions for residential treatment centers between SFY2015 and 2016. However, the number of individuals included was similar. In SFY2016, more individuals started the year in a center but there were less admissions.
12	We are unsure what has caused the increase in co-occurring MH/SA diagnoses. We are hopeful that it is due to our pushing screening for substance issues. Also, many providers are now submitting multiple diagnoses for consumers, instead of just the primary diagnosis.
16	The increase in the number of adults with SMI receiving Supported Housing and ACT services are due to better reporting. These measures are now included in data that has to be submitted every six months.
