Note:

US totals are based on states reporting.

This table uses data from URS Table 15.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

Beginning in FY 2004 (URS Yr. 3) dually eligible Medicare/Medical Assistance individuals are not included in the counts if they receive only Medicare reimbursed services. 'Race not available' includes clients that identified as 'other race' (N=58)

Maryland

URS Table Number	General Notes
4	The decreases in the number of employed and Not in the Labor Force appear to be due to the increase in the number of which data is "Not Available". The percentage of those that had data "Not Available" increased by the same percentage in which the other categories decreased.
6	The increase in the total number of consumers served in community programs is a by product of a 9% overall increase in the number of individuals being served from the prior year, and a result of individuals being served in community outpatient and not within an inpatient settings.
14A	The change from ICD-9 to ICD-10 codes has resulted in some individuals not being accurately categorized as SED/SMI, which in turn has resulted in a decrease in the total number of clients with SMI/SED from the prior year.
