Massachusetts

URS Table Number	General Notes
5	The MA DMH is not the state Medicaid agency and does not presently have access to Medicaid data to complete this table.
3, 6 & 15	In this FY allocation of BG funds changed. Now all funds other than support for the State Mental Health Planning Council are directed to PACT services for Adults and to Community Based services for Children and their Families.
6	Admissions to psychiatric continuing care units run by the MA DMH, but located in facilities operated by the state Public Health agency are included in the State Hospital category.
6	Individuals admitted to two community mental health centers (CMHCs) delivering acute care and one CMHC providing continuing care are included in "Other Psychiatric Inpatient". This category also includes admissions to private inpatient facilities through contract with the MA DMH.
6	Age group is now calculated at the midpoint of the reporting period to be consistent with the criteria used in construction of the Client Level Reporting files.
8, 16	During 2016 MA amended its allocation of Block Grant funds toward support for the State Mental Health Planning Council, PACT services for adults and Community Based Flexible Supports for Children and Families living with SED. As a result of this change, more children with SED were served as noted in Table 16.
12	Child/adolescent services for the MA DMH are provided through age 18, with adult services delivered for ages 19 and older. Calculations for this table use the federal definition of child and adult.
12	Ages 0 - 3 are served primarily by agencies other than the MA DMH, but service authorization criteria for MA DMH does not preclude service provision for this age group.
12	Individuals counted in the total served by the MA DMH who are referred by the criminal justice system, or seen for outpatient crisis evaluations may or may not meet SMI/SED definitions. All persons who meet DMH clinical standards for approval of continuing care community services meet federal SMI/SED definitions.
12	The calculation for the percentage of persons with a co-occurring diagnosis of substance abuse is obtained by counting the number of persons with a diagnosis of substance abuse on file in the Mental Health Information System (MHIS) as of the close of the reporting period divided by the total served as reported in Table 2 (Total Served) and Table 14 (Total SMI/SED), for whom there was a diagnosis on file in MHIS as of the close of the reporting period. Calculations for FY 16 were updated to include "F" codes for mental health and substance use disorders now used in DSM V and ICD-10, which may account for the increase in percentage of co-occurring diagnoses reported.
15	Living situation is measured at admission for all clients and at the annual review for case managed clients only. In addition, it is assessed annually for all inpatients in state operated facilities with length of stay (LOS) greater than 6 months.
16	Totals for Supported Housing are not available for reporting in SFY16. DMH and CBFS providers collaborated in developing the outcome measures that CBFS providers report to DMH as measures of contract performance. While CBFS providers began reporting housing data in January 2011, the data currently collected does not provide sufficient information to determine which individuals are receiving housing supports consistent with the Supported Housing model. DMH and CBFS providers made significant progress in developing a new housing measure set that is consistent with the federal guidance on the reporting of Supported Housing. However, the implementation of these revised measures was delayed due to a service rate development and re-contracting project that is required under the implementation of Chapter 257 of the Acts of 2008. DMH will continue to work towards the reporting of housing data to comply with federal reporting requirements. The increase in the number of children with SED served is due to an increase in funding which resulted from the re-allocation in Block Grant funding noted in Table 8.
16	Supported employment services are provided within several DMH services, including Community Based Flexible Supports (CBFS), Clubhouse and Program for Assertive Community Treatment (PACT). This data reflects only people enrolled in CBFS services who are receiving supported employment.
16	Fidelity for ACT/PACT programs is measured by a team consisting of MA DMH staff, consumers and a consultant with expertise in ACT, using a scale developed internally, based upon the SAMHSA EBP toolkit. Fidelity is measured every twelve to eighteen months.
16	There were no individuals who received Therapeutic Foster Care in SFY16. This is due primarily to increased difficulties in identifying and recruiting foster parents for this group of DMH youth.
17	Although these EBPs may be provided in some DMH programs, they are not reported as discrete services in the Mental Health Information System (MHIS) and are unavailable for reporting.
