Note:

US totals are based on states reporting.

This table uses data from URS Table 15.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

Living situation is measured at admission and discharge for adult rehabilitative services and at time of service for other clients.

URS Table Number	General Notes
2a, 3, 4, 5a,6,12,14a, & 15	The increases from 2015 to 2016 resulted from using more diagnosis sequence codes than last year to check for mental health conditions. We've also included ICD-10 codes now, even if we got them during the ICD-9 timeframe. Lastly, we have added additional procedure codes and modified some of the criteria for including them. These changes are all a part of a process we started in 2015 to pull data for CLD and URS reporting in a systematic/automated fashion by working with our IT.
9, 11	Our multi-modal survey distribution involved the provider may have increased response rates where as in the past mailing distribution limited our response rates.
