Note:

Are Client Counts Unduplicated? Unduplicated **Number of States with Unduplicated Counts** 43

This table uses data from URS Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2015

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 2a

Age Age is calculated at midpoint of reporting period.
Gender The most recent gender was used for reporting.
Race The most recent race/ethnicity data was used for reporting.
Overall Consumer ID, which is a unique value assigned to each person served, was used for un-duplication. The Centralized Data System (CDS) assigns this value at the creation of the service record based on unique combination of SSN and DOB.

Table 2b

Age Age is calculated at midpoint of reporting period.
Gender The most recent gender was used for reporting.
Race The most recent race/ethnicity data was used for reporting.
Overall Consumer ID, which is a unique value assigned to each person served, was used for unduplication. The Centralized Data System (CDS) assigns this value at the creation of the service record based on unique combination of SSN and DOB.

Total	11,742	100.0%	4,612,414	100.0%	6.2	14.2	58

Note:

US totals are based on states reporting.

This table uses data from URS Table 15a.

US penetration rates are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

Age Age is calculated at midpoint of reporting period.

Gender The most recent gender was used for reporting.

Overall Consumer ID, which is a unique value assigned to each person served, was used for un-duplication. The Centralized Data System (CDS) assigns this value at the creation of the service record based on unique combination of SSN and DOB.

Access Domain: Adults with SMI and Children with SED Served in State Psychiatric Hospitals by Age and Gender, FY 2016

Note:

This table uses data from URS tables 5a and 5b.

Type of Medicaid Data Reported

Data based on Medicaid Eligibility, not Medicaid Paid Services.

State Notes

- 5a Age The most recent race data was used for reporting.
- 5a Gender The most recent gender was used for reporting.
- 5a Overall Medicaid status was reported for the most recent admission date within the fiscal year. See General Notes.
- 5b Overall Medicaid status was reported for the most recent admission date within the fiscal year. This is the same population as presented in Table 5a distributed by ethnicity.

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table3 and 6.

Table 3 State Notes:

Age	Age is calculated at midpoint of reporting period.
Overall	Consumer ID, which is a unique value assigned to each person served, was used for unduplication. The Centralized Data System (CDS) assigns this value at the creation of the service record based on unique combination of SSN and DOB. See General Notes.
Gender	The most recent gender was used for reporting.

Table 6 State Notes:

Hospital	Includes all individuals admitted to a State Regional Mental Health Center (forensic and non-forensic).
Other Inpatient	Includes clients admitted to one of the psychiatric inpatient hospitals within Nebraska, other than a State Regional Mental Health Centers.
Residential	Includes adolescents admitted to one of the adolescent psychiatric units at a state psychiatric hospital.
Community	Includes clients receiving outpatient services at a State Regional Mental Health Center or clients receiving services at a community provider.
Overall	For clients without a discharge date, length of stay was calculated using June 30, 2016 as a 'discharge date'. N/A means no clients fell into this category. See General Notes.

APPROPRIATENESS DOMAIN: Length of Stays in State Psychiatric Hospitals, Other Psychiatric Inpatient and Residential Treatment Centers for Children Settings, FY 2016

What populations are reported? All Clients Number of States Reporting All Clients: 40 Number of States Reporting Some Clients: 18

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
NE	Yes	Yes	-	Yes	Annual re-registration and re-authorization
US	43	28	3	7	26

Note:

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

State Notes:

Age Age is calculated at midpoint of reporting period.
Gender The most recent gender was used for reporting.
Overall The CDS has improved ability to capture updates of information on quarterly basis in addition to admission, discharge, and re-registration/authorization.

Outcomes Domain: Employment Status of Adult Mental Health Consumers Served in the Community by Diagnosis, FY 2016

General Notes FY 2016

Nebraska

URS Table Number	General Notes
All	Individuals included in this reporting are those who were served in a mental health or dual service during fiscal year 2016 funded by the Nebraska DHHS Division of Behavioral Health (DBH). This report does not include individuals served through Medicaid funding. In addition to the 19,816 individuals in the DBH mental health and dual service unduplicated counts, an estimated 1,800 unduplicated individuals not available for reporting received mental health or dual services funded through Medicaid (based on similar spending in FY16 as compared to FY15 when the count was 1,835). In FY16, DBH changed data systems for collection of treatment data. In May 2016, DBH and the Nebraska Behavioral Health System (NBHS) converted from a Magellan operated system to a new Centralized Data System (CDS) hosted by DHHS-DBH. Due to the end of contract with Magellan before the end of FY16, Medicaid counts for FY16 can only be estimated based off those reported in FY15. Through the data conversion from the Magellan system to the new CDS, considerable data clean up was again achieved. The CDS also applied new data entry specifications to improve data collection for items such as SSN, DOB (which improves the ability to accurately unduplicate records), reporting on pregnancy status for women, and quarterly reviews of data fields such as employment, living status and criminal justice involvement leading to improved reporting of information (i.e. decreased cases of unknown employment status).
All	To obtain unduplicated count of persons served, the Division used social security numbers and dates of birth to identify unique clients in the data system.
All	It is expected that higher counts of unknown for both race and ethnicity in FY16 may be the result of data conversion from Magellan to the new CDS and / or that the default option in CDS is 'unknown'. System inquiry and analysis are underway to identify any needed changes in data calculations and reporting.
All	For multi-year edits: In response to requested comments about year-to-year changes in counts, a grouping error within the data system structure was uncovered. The error was such that a juvenile substance use disorder service delivered in a state hospital setting was incorrectly grouped as a mental health service because of its state hospital setting. Reanalysis of the data resulted in the removal of 77 individuals from the analyses; these individuals had only received the previously described substance use disorder service and had not received any mental health services during the reporting period. This correction affected tables which examine services delivered in state hospitals and some of the overall counts. All necessary updates have been made to the tables resulting in slightly different counts for males between the ages of 13-17 and 18-20.
3	In response to requested comments about year-to-year changes in counts, a grouping error within the data system structure was uncovered. The error was such that a juvenile substance use disorder service delivered in a state hospital setting was incorrectly grouped as a mental health service because of its state hospital setting. Reanalysis of the data resulted in the removal of 77 individuals from the analyses; these individuals had only received the previously described substance use disorder service and had not received any mental health services during the reporting period. This correction affected table 3. All necessary updates have been made to the table resulting in slightly different counts for males between the ages of 13-17 and 18-20.
3	There was also an increase in admissions to the State Hospital in 2016 as a result of significant work to get patients discharged and into community based treatment as determined the appropriate next treatment step, thus creating more capacity to admit new patients throughout the year and increasing the total number served in State Psychiatric Hospitals in 2016.
5A	The population for Table 5a is the same population represented in Table 2a. The DBH, which is the state mental health authority (SMHA), does not operate Medicaid in Nebraska, therefore the individuals represented in Table 5a do not include all Medicaid Mental Health funded individuals. It should also be noted that DBH no longer provides a portion of the funding for Medicaid mental health services. This change from two funding sources to one funding source has resulted in a decrease in the number of individuals served who are directly reported to the DBH. Medicaid reported that 1,825 consumers were served in FY15 by Medicaid for specific mental health services. As spending for FY16 was similar, an additional estimated 1,800 unduplicated individuals not available for this reporting received mental health or dual services funded through Medicaid in FY16.

URS Table Number	General Notes
6	<p>This table represents the turnover of the clients shown in Table 2a. Total Served at Beginning of Year (unduplicated): This population includes clients with admission dates before July 1, 2015 and who were discharged after July 1, 2015, or were not discharged. Clients are unduplicated. Admissions During the Year (duplicated), the population was limited to records with admission date which occurred between July 1, 2015 and June 30, 2016. All unique admission dates were counted for each service type. Discharges During the year (duplicated), the population was limited to records with discharge date which occurred between July 1, 2015 and June 30, 2016. All unique discharge dates were counted for each service type. Length of Stay (in Days): Discharged Patients, the population was limited to those persons included in the previous column. Mean and Median number of days was calculated by subtracting the Admission date from the Discharge date of each record. For Clients in Facility for Less than 1 Year: Average Length of Stay (in Days): Residents at end of year: the population was limited to persons who were admitted between July 1, 2015 and June 30, 2016, and did not have a discharge date. Length of stay was calculated as follows: (June 30, 2016-Admission Date). For Clients in Facility More than 1 Year: Average Length of Stay (in Days): Residents at end of year: the population was limited to persons who were admitted prior to July 1, 2015, and did not have a discharge date. Length of stay was calculated as follows: (June 30, 2016-Admission Date).</p>
6	<p>There was a decrease in LOS for adults in facility for 1 year or less and is likely due to the increase in those being discharged. Additional fluctuations in LOS are likely the result of fairly small sample sizes across categories for reporting.</p>
6	<p>In response to requested comments about year-to-year changes in counts, a grouping error within the data system structure was uncovered. The error was such that a juvenile substance use disorder service delivered in a state hospital setting was incorrectly grouped as a mental health service because of its state hospital setting. Reanalysis of the data resulted in the removal of 77 individuals from the analyses; these individuals had only received the previously described substance use disorder service and had not received any mental health services during the reporting period. This correction affected table 6. All necessary updates have been made to the table resulting in slightly different counts for youth and young adults between the ages of 13-17 and 18-20.</p>
6	<p>There was an increase in admissions to the State Hospital in 2016 as a result of significant work to get patients discharged and into community based treatment as determined the appropriate next treatment step, thus creating more capacity to admit new patients in both the State Hospital as well as Other Psychiatric Inpatient settings throughout the year. Counts for Community Programs and Other Psychiatric Inpatient Settings decreased as is expected to be due to significant data cleanup which occurred through the conversion from the Magellan system to the new CDS.</p>
8	<p>TA activities related to training for bringing up Coord Spec Care related to First Episode Psychosis (FEP) resulted in additional expenditures in 2016.</p>
9	<p>DBH drew a stratified random sample of individuals who received services from community mental health and/or dual providers for the second half of Calendar Year (July to December 2015). The sample drawn was used to conduct the annual consumer survey for youth and for adults. Functioning for adult results dropped and will be reviewed by the State wide quality improvement team to identify improvement strategies. Development of additional fields in the CDS which address functional deficits should also offer insight and help identify strategies aimed at supporting improvement in functioning as a result of treatment in services.</p>
11	<p>This is the same SAMPLE as presented in Table 9SC distributed by the rest of 5 domains. While many of the domain scores improved, Outcomes for adult results decreased and will be reviewed for improvement strategies. Overall response rates for adults dropped; methodology for survey implementation will be reviewed by the State wide quality improvement team to identify improvement strategies.</p>
12	<p>The Percent of adults meeting Federal definition of SMI represents the total number of adults (18 and above) found in Table 14A (SMI population) divided by the total number of adults (18 and above) found in Table 2A (Total MH population served). See Table 14A comments for SMI definitions. Percentage of children/adolescents meeting Federal definition of SED represents the total number of children/adolescent (3-17years old) found in Table 14A (SED population) divided by the total number of children/adolescent (3-17 years old). See Table 14A comments for SED definitions. It should be noted that the state's FY16 definitions for SMI and SED include tighter parameters for inclusion as a diagnosis is now expected to accompany the other indicators, unless the provider specifically identifies the individual meets SMI or SED criteria. It is expected that these tightened parameters account for the decrease in percent of youth meeting SED.</p>

URS Table Number	General Notes
12	The Percentage of adults served by the SMHA who also have a diagnosis of substance abuse includes individuals in the reporting population who also 1) have an indicated Substance Use Disorder diagnosis and/or 2) have also received treatment for a Substance Use Disorder in FY16 and/or 3) received treatment in a dual diagnosis program. This count is then divided by the total number of Adults in the population. Percentage of children/adolescents served by the SMHA who also have a diagnosis of substance abuse problem applies the same criteria as explained for adults. It includes the children/adolescent population served by SMHA who also 1) have an indicated Substance Use Disorder diagnosis and/or 2) have also received treatment for a Substance Use Disorder in FY16 and/or 3) received treatment in a dual diagnosis program. This count is then divided by the total number of children/adolescents in the population.
12	Percentage of adults meeting Federal definition of SMI who also have a diagnosis of substance abuse includes those in the population who meet the Federal definition for SMI and meet the substance use disorder and / or dual criteria (as described in comment 11). This count is then divided by the total number of adults with SMI in the population (Table 14A). Percentage of children/adolescents meeting the Federal definition of SED who also have a diagnosis of substance abuse problem includes those in the population who meet the Federal definition for SED and meet the substance use disorder and / or dual criteria (as described in comment 11). This count is then divided by the total number of children/adolescents with SED in the population (Table 14A).
12	The percentage of children/adolescents meeting the SED definition decreased in 2016 and is expected to be due to more stringent data requirements for meeting the definition. In 2015, SED was assumed for certain service types and included in SED counts regardless of known information related to diagnosis, ICD codes, or a provider's specific classification of SED. In 2016, tighter parameters were put in place to run analysis and are expected to provide more accurate (though decreased) counts and percentages related to SED.
12	Higher percentages of adults and children served with co-occurring diagnoses is the result of improved technical assistance and instruction related to collecting information on all known behavioral health diagnoses in addition to continued work to identify and address co-occurring mental health and substance use disorders across the behavioral health provider network.
14A	This table represents the distribution of the adult SMI and children/adolescent SED population. This population is a subset of the population presented in Table 2A. See note for T5A for more information.
14A	NE State SMI Definition (tighter parameters than used in FY15): Age 18 or older AND ICD-10 codes including: F20.0, F20.1, F20.2, F20.3, F20.5, F20.81, F20.89, F20.9, F22, F23, F24, F25.0, F25.1, F25.8, F25.9, F28, F29, F30.10, F30.11, F30.12, F30.13, F30.2, F30.3, F30.4, F30.8, F30.9, F31.0, F31.10, F31.11, F31.12, F31.13, F31.2, F31.30, F31.31, F31.32, F31.4, F31.5, F31.60, F31.61, F31.62, F31.63, F31.64, F31.70, F31.71, F31.72, F31.73, F31.74, F31.75, F31.76, F31.77, F31.78, F31.81, F31.89, F31.9, F32.0, F32.1, F32.2, F32.3, F32.4, F32.5, F32.8, F32.9, F33.0, F33.1, F33.2, F33.3, F33.40, F33.41, F33.42, F33.8, F33.9, F34.8, F34.9, F39, F44.89 AND GAF score= 1-59 OR ICD-10 codes including F20.0, F20.1, F20.2, F20.3, F20.5, F20.81, F20.89, F20.9, F22, F23, F24, F25.0, F25.1, F25.8, F25.9, F28, F29, F30.10, F30.11, F30.12, F30.13, F30.2, F30.3, F30.4, F30.8, F30.9, F31.0, F31.10, F31.11, F31.12, F31.13, F31.2, F31.30, F31.31, F31.32, F31.4, F31.5, F31.60, F31.61, F31.62, F31.63, F31.64, F31.70, F31.71, F31.72, F31.73, F31.74, F31.75, F31.76, F31.77, F31.78, F31.81, F31.89, F31.9, F32.0, F32.1, F32.2, F32.3, F32.4, F32.5, F32.8, F32.9, F33.0, F33.1, F33.2, F33.3, F33.40, F33.41, F33.42, F33.8, F33.9, F34.8, F34.9, F39, F44.89 AND indicated functional deficit OR ICD -10 codes including F20.0, F20.1, F20.2, F20.3, F20.5, F20.81, F20.89, F20.9, F22, F23, F24, F25.0, F25.1, F25.8, F25.9, F28, F29, F30.10, F30.11, F30.12, F30.13, F30.2, F30.3, F30.4, F30.8, F30.9, F31.0, F31.10, F31.11, F31.12, F31.13, F31.2, F31.30, F31.31, F31.32, F31.4, F31.5, F31.60, F31.61, F31.62, F31.63, F31.64, F31.70, F31.71, F31.72, F31.73, F31.74, F31.75, F31.76, F31.77, F31.78, F31.81, F31.89, F31.9, F32.0, F32.1, F32.2, F32.3, F32.4, F32.5, F32.8, F32.9, F33.0, F33.1, F33.2, F33.3, F33.40, F33.41, F33.42, F33.8, F33.9, F34.8, F34.9, F39, F44.89 AND SSI/SSDI eligible or potentially eligible OR ICD-10 codes including F20.0, F20.1, F20.2, F20.3, F20.5, F20.81, F20.89, F20.9, F22, F23, F24, F25.0, F25.1, F25.8, F25.9, F28, F29, F30.10, F30.11, F30.12, F30.13, F30.2, F30.3, F30.4, F30.8, F30.9, F31.0, F31.10, F31.11, F31.12, F31.13, F31.2, F31.30, F31.31, F31.32, F31.4, F31.5, F31.60, F31.61, F31.62, F31.63, F31.64, F31.70, F31.71, F31.72, F31.73, F31.74, F31.75, F31.76, F31.77, F31.78, F31.81, F31.89, F31.9, F32.0, F32.1, F32.2, F32.3, F32.4, F32.5, F32.8, F32.9, F33.0, F33.1, F33.2, F33.3, F33.40, F33.41, F33.42, F33.8, F33.9, F34.8, F34.9, F39, F44.89 AND were admitted to a Community Mental Health Rehabilitation Based Services: Community Support, Assertive Community Treatment, Psychiatric Residential Rehabilitation, Day Treatment, Day Rehabilitation, Day Support, Vocational Support, or related psychiatric rehabilitation services OR Provider selected 'YES' for Meets SMI Criteria.

URS Table Number	General Notes
14A	NE State SED Definition (tighter parameters than used in FY15): Age 3-17 AND ICD-10 codes including F20.0, F20.1, F20.2, F20.3, F20.5, F20.81, F20.89, F20.9, F22, F23, F24, F25.0, F25.1, F25.8, F25.9, F28, F29, F30.10, F30.11, F30.12, F30.13, F30.2, F30.3, F30.4, F30.8, F30.9, F31.0, F31.10, F31.11, F31.12, F31.13, F31.2, F31.30, F31.31, F31.32, F31.4, F31.5, F31.60, F31.61, F31.62, F31.63, F31.64, F31.70, F31.71, F31.72, F31.73, F31.74, F31.75, F31.76, F31.77, F31.78, F31.81, F31.89, F31.9, F32.0, F32.1, F32.2, F32.3, F32.4, F32.5, F32.8, F32.9, F33.0, F33.1, F33.2, F33.3, F33.40, F33.41, F33.42, F33.8, F33.9, F34.8, F34.9, F39, F44.89, 300.01, 300.21, 300.3, 301.13, 307.1, 307.23, 307.51, 309.81, 312.34, 314, 314.01, 314.1, 314.2, 314.8, 314.9, F40.01, F41.0, F42, F43.10, F43.11, F43.12, F44.89, F50.00, F50.01, F50.02, F50.2, F63.81, F90.0, F90.1, F90.2, F90.8, F90.9, F95.2 AND SSI/SSDI eligible or potentially eligible OR ICD-10 codes including F20.0, F20.1, F20.2, F20.3, F20.5, F20.81, F20.89, F20.9, F22, F23, F24, F25.0, F25.1, F25.8, F25.9, F28, F29, F30.10, F30.11, F30.12, F30.13, F30.2, F30.3, F30.4, F30.8, F30.9, F31.0, F31.10, F31.11, F31.12, F31.13, F31.2, F31.30, F31.31, F31.32, F31.4, F31.5, F31.60, F31.61, F31.62, F31.63, F31.64, F31.70, F31.71, F31.72, F31.73, F31.74, F31.75, F31.76, F31.77, F31.78, F31.81, F31.89, F31.9, F32.0, F32.1, F32.2, F32.3, F32.4, F32.5, F32.8, F32.9, F33.0, F33.1, F33.2, F33.3, F33.40, F33.41, F33.42, F33.8, F33.9, F34.8, F34.9, F39, F44.89, 300.01, 300.21, 300.3, 301.13, 307.1, 307.23, 307.51, 309.81, 312.34, 314, 314.01, 314.1, 314.2, 314.8, 314.9, F40.01, F41.0, F42, F43.10, F43.11, F43.12, F44.89, F50.00, F50.01, F50.02, F50.2, F63.81, F90.0, F90.1, F90.2, F90.8, F90.9, F95.2 AND were admitted to one of the following programs: Professional Partner Services, Special Education Services, Day Treatment MH, Intensive OP – MH, Therapeutic Consultation/School Wrap, Respite Care – MH OR Provider selected 'YES' for Consumer Meets NE SED Criteria.
16	Adults with SMI served is the same adult population found in Table 14A. Children with SED are the same child/adolescent population found in Table 14a.
17	Receiving Integrated Treatment for Co-occurring Disorders (MH/SA) represents individuals listed as receiving treatment in a dual-diagnosis program service use records. It is believed that the continued increase in the number of consumers receiving Integrated Dual Dx Services is due to a multi-year statewide initiative to improve the identification of individuals with dual diagnoses through provider training and referral processes.
19A	Consumers using state funded behavioral health services are asked the question: "Have you had any arrests within the last 30 days" at admission and discharge. Individuals who are admitted to one of the state psychiatric hospitals are not asked this question, and a code of N/A is assigned to those individuals. If a consumer did not have an admission or discharge date within T1 or T2, then they were included in the 'No Response' category. For Consumers in Service for at least 12 months: Individuals identified in Table 2A, who had a service date within the data system prior to 7/1/14, were included in this table. For Consumers who began using Mental Health services within the last 12 months: Individuals identified in Table 2A, who had a first admission in the data system within the current fiscal year (7/1/15-6/30/16). T2: Included those who had self-reported at least one arrest or criminal justice system encounter within the current fiscal year (7/1/15-6/30/16) or did not report any arrests. T1: Included those who had self-reported at least one arrest or criminal justice system encounter within the previous fiscal year (7/1/14-6/30/15) or did not report any arrests. If Arrested at T1 (change): Individuals identified in T1 that had a self-reported arrest during the previous fiscal year, and had a self-reported arrest within the current fiscal year or did not have a self-reported arrest during the current fiscal year. If not Arrested at T1 (change): Individuals identified in T1 that did not have a self-reported arrest during the previous fiscal year, and had a self-reported arrest within the current fiscal year or did not have an a self-reported arrest during the current fiscal year. Individuals missing birth date were included in the adult population.
19B	Consumers age 3-17 using state funded behavioral health services are asked the question: "Has your child been attending school in the last 3 months?" at admission, annual re-registration, annual re-authorization, and discharge. Individuals who are admitted to one of the state psychiatric hospitals are not asked this question, and a code of N/A is assigned to those individuals. T2: Included those who had self-reported suspended within the current fiscal year (7/1/15-6/30/16) or did not report any suspends. NE started to collect school attendance information at discharge in JULY 2011 and has previously reported T1 and T2; however, due to data conversion DBH is only able to report T2 for FY16.
