US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table3 and 6.

Table 3 State Notes:

Age Counts of children decreased from 2014 due to internal data QA data findings. Queries were reconstructed and resulted in apparently outsize decreases in numbers served.
 Overall State Psychiatric hospital data reflects counts of discharges by age, this aligns with prior year methodology.
 Gender One of our providers was unable to provide accurate gender information for 600+ of their clients in time for the 2015 report.

URS Table Number	General Notes
8	The decrease in total MHBG expenditures for Non-Direct Service Activities from 2014 is due to a decrease in administration costs: the MHBG State Planner position was vacant for an extended period of time.
12	The revised Phoenix database was implemented in May of 2016. The diagnosis data has not been completely loaded into this database yet which has resulted in a decrease in the percent of adults and children served by the SMHA with co-occurring MH/SA diagnosis.
