## New Jersey

URS Table Number	General Notes
3 & 6	State hospital data in Table 3 & 6 is from DMHAS's Hospital Census (Oracle) database whereas that in Table 2a is from the USTF client registry.
6	The duplicated number of Admissions during the year and the duplicated number of Discharges during the year in Other Psychiatric Inpatient category are much lower than the numbers in SFY 2015. It is because these numbers were obtained from partial year than the entire year. The numbers are being updated and become final by mid-March 2017. This is relevant for the Multi-year data edits.
8	The two years' MHBG Expenditure for Non-Direct Services Activities is not comparable because different expenses were incurred in different years. For example, an expense of \$21,000 incurred in 2015 but not in 2016. SMHAS paid NJDOH \$21,000 for including seven mental health questions in 2014 NJ Behavioral Risk Factor Survey. This is relevant for the Multi-year data edits.
10	All Block Grant allocation amounts are listed in the Adult/SMI Column as we are unable to provide a breakdown.
11a	Children's data were entered except for the "social connectedness" and "functioning". A breakdown by race was not available for "social connectedness" and "functioning". The reported total numbers were slightly different from the numbers in Table 11 because some respondents did not report their race.
14, 15a	State hospital data in Table 14 is from the USTF client registry, whereas that in Table 15A is from DMHAS's Hospital Census (Oracle) database. The different sources explain the discrepancy in total numbers of consumers reported.
16	The number (48,609) includes 40,644 reported by the Children's System of Care (CSOC) and 7,965 reported by SMHA. In SYF 2015, CSOC did not report the number of children with SED served by CSOC. This is relevant for the Multi-year data edits.
17	A revised SFY15 value of 3,544 has been calculated for the total number of consumers receiving family psychoeducation services. In SFY 2015, a total of 3,544 consumers received family psychoeducation services. The SFY15 to SFY16 change is a decrease of 3.75%. This is relevant for the Multi-year data edits.
19A	On Table 19a (Criminal Justice), Survey respondents who self-identified as "Transgendered Males" were coded as "Male", and those who self-identified as "Transgendered Females" were coded as "Female".
21	SMHA does not collect readmission data on other psychiatric units than those in state psychiatric hospitals.
