Note:

Are Client Counts Unduplicated? Unduplicated **Number of States with Unduplicated Counts** 43

This table uses data from URS Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2015

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 2a

Age Age is calculated at midpoint of the State's elected reporting period (i.e., December 31, 2016).
Gender Pregnant women - pregnancy status search was limited within the reporting period for clients 15 years and older, which is the earliest age used by CDC to report teen pregnancy.
Race Demographic values (age, gender, race, ethnicity) - value was based on the client's most recent record except when the value is Unknown and search for a valid value was made within the 12 months prior to the end of the reporting period.
Overall This table has been populated using North Carolina's first year submission of MH-TEDS data files. The data source, methodology, and basic assumptions used in populating may account for significant differences from earlier. See General Notes.

North Carolina

URS Table Number	General Notes
All	Numbers of consumers living in private residence increased in FY16 due to an increase in residential data collection. The FY15 jail data was too low. It should have been 2,045. There was actually a decrease in the number of consumers in jail/correctional facility in FY16. The increase in homeless/shelter in FY16 is due to an increase in residential data collection. The FY15 number of consumer's homeless/shelter should have been 343.
8	The SMHA increased access to and provision of technical assistance and related activities to promote effective practices through policy development, best practice fidelity and workforce development. Focus is in crisis services, system of care for children with SED and consumer, youth, family and peer led/run services, supports and organizations.
20A	The decreases in total percent readmitted within 30 days and 180 days are due to in 2015, the persons served total included all individuals with a Mental Health Diagnosis, whether Principal or additional. In 2016, the persons served total included only individuals who had a Principal diagnosis of Mental Health.
