Rhode Island

URS Table Number	General Notes
2, 3, 6	RI has no state psychiatric hospital, but rather adult psychiatric/forensic units in a general hospital and acute inpatient care contracted through private hospitals
2, 3, 6, 12, 14, 15	Only children served through the community mental health centers are included.
3	Table 3 counts the number of state-funded clients in inpatient settings. Because of the affordable care act, RI ended its Respect contract as of December 31, 2013 which provided state funding for these services and the numbers of clients served was reduced.
5a	Due to the affordable care and Medicaid expansion funding was shifted from state dollars to Medicaid. RI has been very effective in getting its mental health clients signed up for Medicaid expansion, thus the increase in Medicaid funding in this table. In addition, budget cuts account for a reduction in state funding for services.
6	Total admissions: the prior data was reported incorrectly, they included readmissions for medical patients that were non-psychiatric. We have reworked how this data is collected and by doing so we need to correct the prior year's submission. When we only include the Eleanor Slater Hospital's psychiatric admissions the number of new admissions for 2013 is 60 and for 2014 it is 51. There has been a drastic surge in forensic patients, both males and females over the past calendar year. As a result of increased forensic admissions, we have had to decrease the number of civil patients admitted to the hospital. These are patients that would be transferred from local community psychiatric hospitals. The average length of stay was lower in the past due to the inclusion of medical patients. In addition the LOS overall for psychiatric patients has nearly doubled due to the complexity of the patient population. Our patients come to our facility sicker and stay longer. This period of stabilization has increased, therefore length of stay has increased. An additional factor is availability of community placements. The community has limited resources and at times, discharge planning takes longer when a placement is unavailable at the time of pending discharge.
8	The increase in Total MHBG Expenditures for Non-Direct Service Activities is due to services previously covered by MH Block grant were now covered by ACA freeing up MH Block grant dollars for non-service expenditures
9, 11/11a, 16, 19a/19b, 20a/20b	Although we attempt to provide children's data for applicable tables, and are able to include children's counts of those served through the Community Mental Health Organizations, we do not have access to many of the measures relating to children in the listed Tables 9: Social Connectedness, 11/11a: Children's Consumer Survey, 16: Children with SED receiving Therapeutic Foster Care, Multi Systemic Therapy, or Family Functional Therapy, 19a: Criminal Justice Involvement, 19b: School attendance, and 20a/b: Hospitalizations for those under 18
17	The EBPS are from point in time snapshots for clients served in a month. Therefore they are two different samples of clients that do not necessarily match.
