Total	\$516,292	100.0%	100.0%

Note: This table use data from URS Table 8.

State Notes:

Planning Council activities are included in the Department's administrative portion of the Mental Health Block Grant.

STRUCTURE DOMAIN: State Mental Health Agency Controlled Expenditures for Mental Health, FY 2015**STATE Tennessee**

	Expenditures: State	Percent of Total Expenditures: State	Expenditures: U.S.	Percent of Total Expenditures: U.S.
State Hospitals-Inpatient	\$131,200,000	20%	\$8,340,684,868	22%
Other 24-Hour Care	\$124,000,000	19%	\$6,326,751,257	17%
Ambulatory/Community	\$376,500,000	58%	\$22,187,984,421	59%
Total	\$646,200,000	-	\$37,767,897,721	-

Note:

Other 24-Hour Care includes state psychiatric hospital and community based other 24-hour as well as community based inpatient expenditures.

Ambulatory/Community includes expenditures for less than 24-hour care services provided at state psychiatric hospitals. It excludes community based other-24 hour and community based inpatient expenditures.

Total also includes additional SMHA Expenditures for research, training, administration, and other central and regional office expenditures.

Data from NRI's Funding Sources and Expenditures of State Mental Health Agencies, FY 2015 reports - Table 18 "SMHA-Controlled Expenditures for Mental Health Services."

U.S. totals are based on 50 states reporting.

More information on the State Mental Health Agency's Revenues & Expenditures as well as State Footnotes can be found on the NRI website:

Tennessee

URS Table Number	General Notes
2A, 5A,14A & 21	TennCare (Medicaid) includes Native Hawaiians and Other Pacific Islander in the Asian race category. TennCare does not collect a multi-race data field.
2A, 3, 5A, 6, 12, 14A, 15A, 21	Increases in the behavioral health population reflect, in part, increases in the Medicaid population due to suspension of Medicaid reverification processes. Increases may also reflect a different process used to identify the behavioral health population. In FY2016, both primary and secondary diagnoses were used to identify individuals receiving behavioral health services. In FY2015, the secondary, tertiary, or quaternary diagnosis was used to identify individuals with substance use diagnoses.
3, 15A	A person who was served in both a community setting and inpatient setting was included in both rows. "Other psychiatric inpatient" includes psychiatric inpatient services provided to TennCare (Medicaid) enrollees and to indigent patients through private psychiatric hospitals under contract with the TDMHSAS.
4	The 22% increase in consumers employed is attributable to the crisis data set including a 5% increase in individuals receiving crisis services, a 24% decrease in unknown employment status, and a 23% increase with part-time or full-time employment status.
4	This table was populated by NRI using Tennessee's 2016 MH-CLD reporting. Tennessee's MH CLD does not include all clients served in community settings during the year and is limited to those clients that participated in the state developed survey process.
6	The origin of the community data is the state Medicaid agency.
8	The 5% set-aside for MHBG administration increased from \$433,115 in FY2015 to \$516,292 in FY2016 due to an increase in the total MHBG award from \$8,833,476 to \$10,325,846. The increased total MHBG award includes additional funds allocated for the First Episode Psychosis initiative.
12, 14A & 15A	TennCare employs an operational definition of SMI/SED based on behavioral health diagnosis (ICD-9 code range 290.xx-314.xx) and a 15-month claims history to categorize individuals as having serious mental illness (SMI). TDMHSAS Office of Research developed and shared a crosswalk to link these ICD-9 diagnoses to ICD-10 diagnoses. Substance abuse disorders (SUD) were based on the presence of a primary or secondary diagnosis of substance abuse disorder (ICD-10 section F10-F19: Disorders due to psychoactive substance use). Co-occurring diagnoses were based on a primary mental health diagnosis and a secondary substance use diagnosis.
12 & 21	Data only includes TennCare (Medicaid) data.
14A & 15A	In March 2015, Crisis Services stopped collecting data on diagnoses.
15	The total number of individuals with a Homeless/Shelter designation reflects a 5% increase in total served and better data collection for crisis services including a 36% decrease in "unknown living situation" and an 18% increase in "homeless".
16 & 17	Differences in these tables may be attributed to differences in the number of and specific providers submitting data in FY15 and FY16.
20A/B	The differences between FY2015 and FY2016 reflect different methods used to compile the data.
