Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS/DIG Table 3.

This table uses data from URS/DIG Table3 and 6.

#### **Note:**

\*In Labor Force is the sum of consumers employed and unemployed.

\*\*With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

18	Alabama has chosen not to report this optional table. We are unable to obtain sufficient information from the contract pharmacies that service two state hospitals to report accurately. We also have several community mental health centers who have become unable to report this information to us for all clients.
Data in General	It has been noted there is an increase in the number of consumers for whom age, sex and race are not available this year. A problem has been identified with data reported by 5 providers during the last quarter. DMHS is working to resolve this issue.
