Note:
This table uses data from URS/DIG Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2009
US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS/DIG Table 3.

This table uses data from URS/DIG Table3 and 6.

URS Table Number	General Notes
6	There is a 40% increase (from 2009) in the average LOS of children (in facility less than one year) who were state hospital residents at the end of the year. There are multiple reasons that may account for this increase. DMH contracts with community hospitals to provide inpatient treatment for most children/adolescents for whom services are purchased. As a result, the size of state hospital units that treat these individuals are being decreased or closed. Forensic cases that have longer length of stays may make up a greater proportion of the admissions resulting in a longer average LOS.
