Note:

Are Client Counts Unduplicated? Unduplicated Number of States with Unduplicated Counts 43

This table uses data from URS/DIG Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2009

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 2a

Age Age calculated as of 7/1/2009
Gender None
Race None
Overall The number of clients between 2009 and 2010 has increased by a 6,600. The reason for this increase translates back to an increased number of persons who have lost their jobs and then applying for Medicaid and/or County funded services.

Table 2b

Age Age calculated as of 7/1/2009
Gender None
Race None
Overall None

State used Federal SED Definition? No See Attachment

Note:
This table uses data from URS/DIG Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2009
US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS/DIG Table 3.

This table uses data from URS/DIG Table3 and 6.

Note:

US totals are based on states reporting.

This table uses data from URS/DIG Table 20.

State Notes:

None

STRUCTURE DOMAIN: State Mental Health Agency Controlled Expenditures for Mental Health, FY 2008

STATE Iowa

	Expenditures: State	Percent of Total Expenditures: State	Expenditures: U.S.	Percent of Total Expenditures: U.S.
State Hospitals-Inpatient	\$35,630,000	10%	\$9,587,729,744	26%
Other 24-Hour Care	\$49,780,000	13%	\$6,700,564,081	18%
Ambulatory/Community	\$283,982,000	76%	\$19,584,306,106	53%
Total	\$373,575,000	-	\$36,687,130,712	-

Note:

Other 24-Hour Care includes state psychiatric hospital and community based other 24-hour as well as community based inpatient expenditures.

Ambulatory/Community includes expenditures for less than 24-hour care services provided at state psychiatric hospitals. It excludes community based other-24 hour and community based inpatient expenditures.

Total also includes additional SMHA Expenditures for research, training, administration, and other central and regional office expenditures.

Data from NRI's Funding Sources and Expenditures of State Mental Health Agencies, FY 2008 reports - Table 18 "SMHA-Controlled Expenditures for Mental Health Services."

U.S. totals are based on 50 states reporting.

More information on the State Mental Health Agency's Revenues & Expenditures as well as State Footnotes can be found on the NRI website:
<http://www.nri-inc.org/projects/Profiles/RevenuesExpenditures.cfm>

STRUCTURE DOMAIN: State Mental Health Agency Controlled Revenues by Funding Sources, FY 2008

STATE Iowa

Iowa

URS Table Number	General Notes
2a	The number of clients between 2009 and 2010 has increased by a 6,600. The reason for this increase translates back to an increased number of persons who have lost their jobs and then applying for Medicaid and/or County funded services.
6, 20a, 20b	The Iowa Department of Human Services has changed the system through which State Psychiatric Hospitals report client data. We expected to have some differences in data because this.

Attachment 1

Definitions for “SMI” and “SED”

The Public Health Services Act requires that states establish definitional criteria to identify adults with serious mental illness and children with serious emotional disturbance. Federal guidance allows states to be broader than, but not more restrictive than the federal definitions for serious mental illness and serious emotional disturbance.

Target Population Definitions for Adults

Adults with Serious Mental Illness (SMI)¹

Pursuant to section 1912(c) of the Public Health Service Act, adults with serious mental illness SMI are persons who meet all three of the following:

- 1) Are age 18 and over.
- 2) Who currently have, or at any time during the past year had a diagnosable mental, behavioral, or emotional disorder of sufficient duration to meet diagnostic criteria specified within the DSM-IV or their ICD-9-CM equivalent (and subsequent revisions) with the exception of DSM-IV "V" codes, substance use disorders, and developmental disorders, which are excluded, unless they co-occur with another diagnosable serious mental illness.
- 3) That has resulted in functional impairment, which substantially interferes with or limits one or more major life activities. Federal Register Volume 58 No. 96 published Thursday May 20, 1993 pages 29422 through 29425.

The definition states "adults who would have met functional impairment criteria during the referenced year without the benefit of treatment or other support services are considered to have serious mental illnesses.

Adults with Chronic Mental Illness (CMI):

Iowa code also defines adults who have chronic mental illness. As the definitional criteria for chronic mental illness (CMI) is somewhat more restrictive than the criteria for serious mental illness, adults with CMI are considered to be included within the target population of adults with SMI. Outcomes data should be collected and provided for this population.

"Chronic mental illness" means the condition present in persons aged 18 and over who have a persistent mental or emotional disorder that seriously impairs their functioning relative to such primary aspects of daily living as personal relations, living arrangements, or employment. People with chronic mental illness typically meet at least one of the following criteria:

1. They have undergone psychiatric treatment more intensive than outpatient care more than once in a lifetime (e.g., emergency services, alternative home care, partial hospitalization or inpatient hospitalization).
2. They have experienced at least one episode of continuous, structured, supportive residential care other than hospitalization.

In addition, people with chronic mental illness typically meet at least two of the following criteria on a continuing or intermittent basis for at least two years:

1. They are unemployed, employed in a sheltered setting, or have markedly limited skills and a poor work history.
2. They require financial assistance for out-of-hospital maintenance and may be unable to procure this assistance without help.
3. They show severe inability to establish or maintain a personal social support system.
4. They require help in basic living skills.
5. They exhibit inappropriate social behavior that results in demand for intervention by the mental health or judicial system.

In atypical instances, a person who varies from these criteria could still be considered to be a person with chronic mental illness.

Target Population Definition for Children and Youth

The Iowa definition for SED is consistent with and somewhat broader than the federal definition. As federal guidance allows states to be broader than, but not more restrictive than the federal definition, it is only necessary to use the Iowa definition for SED.

Children with Serious Emotional Disturbance (SED)²

Children or youth who meet the criteria for Serious Emotional Disturbance are children or youth who have:

"...A diagnosable mental, behavioral, or emotional disorder of sufficient duration to meet diagnostic criteria specified within the most current diagnostic and statistical manual of mental disorders published by the American Psychiatric association that results in a functional impairment. Serious emotional disturbance does not include substance use and developmental disorders unless such disorders co-occur with such a diagnosable mental, behavioral, or emotional disorder."

Related Definitions in Iowa Code Section 225C.51:

Child(ren): Child or children means a person who is under eighteen years of age.

Youth: Youth means a person eighteen years of age or older but under twenty-two years of age who met the criteria for having a serious emotional disturbance prior to the age of eighteen.

Functional Impairment: "*Functional impairment*" means difficulties that substantially interfere with or limit a person from achieving or maintaining one or more developmentally appropriate social, behavioral, cognitive, communicative, or adaptive skills and that substantially interfere with or limit the person's role in or functioning in family, school, or community activities. "*Functional impairment*" includes difficulties of episodic, recurrent, and continuous duration. "*Functional impairment*" does not include difficulties resulting from temporary and expected responses to stressful events in a person's environment.

Other interpretive guidelines:

Serious Emotional Disturbance also includes:

- children and youth with serious emotional disturbance who have co-occurring substance abuse, developmental disability, autism spectrum disorders or other specialty health care needs,
- children and youth with serious emotional disturbance who are at risk for, involved with, and/or returning to the community from other more restrictive settings, such as psychiatric hospitals, substance abuse treatment facilities, foster family homes, foster group care, emergency shelters, psychiatric medical institutions for children, mental health institutes, or detention centers, and
- children and youth whose mental or emotional condition, whether chronic or acute, represents a danger to themselves, or others.
