State used Federal SMI Definition? Federal definition corresponds to MN categories for adults with SPMI or acute mental illness. See attachment for definitions.

State used Federal SED Definition? Federal definition corresponds to MN definition for children with SED plus children with ED. See attachment for definitions.

Note:

This table uses data from URS/DIG Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2009
US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS/DIG Table 3.

This table uses data from URS/DIG Table3 and 6.

Mississippi

URS Table Number	General Notes
6	The average LOS in state psychiatric hospitals decreased for both children and adults from 2009 to 2010. Emphasis on consistency in reporting across facilities has continued.
8	The amount spent on MHA Technical Assistance Activates accounted for most of the 35% increase in MHBG expenditures for non-direct services from 2009 to 2010. The amount spent on Administration increased only slightly (approximately \$500) and is within the allowed limits for the block grant.
11	Mississippi uses a supported mail procedure in implementing the satisfaction survey process. Since we did not mail or call individuals, but instead had surveys delivered to them (supported mail) to allow the purpose of the survey and other consent information to be explained to potential respondents, we calculated the response rate based on the number of surveys sent out to the local level (i.e. sample size).
12	The total number of children served by the SMHA increased in FY2010 (from 2009) resulting in a 33% increase in the percent of children/adolescents meeting the federal definition of SED.
16	Supported Housing: DMH continued work in FY2010 to develop capacity to collect data for evidence-based practices by the FY2011 timeline. The federal definition of supported housing as an EBP as proposed in URS Table 16 is similar to what is referred to in Mississippi as "supervised housing." DMH will continue activities through its DIG Quality Improvement project to examine the similarities and differences in state and proposed service definitions, including the issue of data collection for supported housing. DMH is continuing work on developing capacity for collection of information, for reporting EBPs (such as supported housing and for improving data integrity for the NOMs, with support from the CMHS DIG for Quality Improvement.
16	Supported Employment: As in previous years, the DMH will continue to collect/report information on the number of individuals served in transitional employment programs, as defined by the state. DMH has continued work in FY2010 to develop capacity to collect data for EBPs. The federal definition of supported employment as an EBP as proposed in Table 16 has some components that are similar to the state definition of supported employment, but differs along some components. DMH will continue activities through its DIG project to examine the similarities and differences in state and proposed service definitions, including the issue of data collection for supported employment. DMH is continuing work on development of capacity for collection of data for the NOMs on EBPs with support from CMHS DIG Quality Improvement grant.
16	Assertive Community Treatment: The Person-centered Planning project, implemented in four regions, targeted individuals at risk for hospitalization or rehospitalizations, and is exploring using a more team-oriented approach to transition planning, which is one element of the proposed federal definition of Assertive Community Treatment. In May 2005, staff from the DMH Division of Community Services attended the Annual Assertive Community Treatment (ACT) Conference in Tampa, Florida. Technical assistance on ACT was provided in 2006, through support/collaboration with NAMI-MS; the role that peer specialists might play in provision of ACT services has also been explored. Since that time, DMH Division of Community Services staff has visited with staff of the VA Hospital's ACT team in Jackson. Staff from Region 15's community mental health center have visited the ACT team in Little Rock, Arkansas (in March 2007), and the DMH sent a team (that includes regional staff that participated in the PCP project) to Oklahoma at the end of FY 2007 to obtain additional, follow-up technical assistance regarding implementation of ACT. Since that time, an ACT Steering Committee has been established to continue work on development of ACT and efforts have continued to seek funding support for ACT teams. DMH continued activities through its Data Infrastructure Grant (DIG) Quality Improvement project to develop the capacity of the central data repository system for data collection and reporting of evidenced based practices, such as assertive community treatment. In 2009, DMH staff and staff representatives from Region 6, Life Help CMHC traveled to Tulsa, Oklahoma to receive training in the PACT model. In April 2010, the PACT Coordinator from Oklahoma came to Greenwood, MS, to provide onsite technical assistance. Life Help has PACT staff hired and projects that it began serving individuals in July 2010
