State used Federal SMI Definition? Yes

State used Federal SED Definition? Yes

Note:
This table uses data from URS/DIG Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2009

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS/DIG Table 3.

This table uses data from URS/DIG Table3 and 6.

Note:

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data for URS/DIG Table 4a.

Forensics included in "non forensic" data? No

Note:

US totals are based on states reporting.

This table uses data from URS/DIG Table 20.

State Notes:

The decrease in Total Percent Readmitted (both within 30 and 180 days) has decreased 50% for both categories between SFY 2009 and SFY 2010. The most likely explanation for this improvement is the establishment of the DMHS Centralized Admissions Unit in February 2010. It is believed that this unit has meaningfully improved the overall admissions process to NJ state psychiatric hospitals, and as a result, readmissions have decreased.

OUTCOMES DOMAIN: Civil (Non Forensic) & Forensic Patients Readmission within 180 Days by Age, Gender, and Race, FY 2010

STRUCTURE DOMAIN: State Mental Health Agency Controlled Expenditures for Mental Health, FY 2008

STATE New Jersey

	Expenditures: State	Percent of Total Expenditures: State	Expenditures: U.S.	Percent of Total Expenditures: U.S.
State Hospitals-Inpatient	\$502,500,000	29%	\$9,587,729,744	26%
Other 24-Hour Care	\$584,657,434	34%	\$6,700,564,081	18%
Ambulatory/Community	\$597,518,371	35%	\$19,584,306,106	53%
Total	\$1,706,776,011	-	\$36,687,130,712	-

Note:

Other 24-Hour Care includes state psychiatric hospital and community based other 24-hour as well as community based inpatient expenditures.

Ambulatory/Community includes expenditures for less than 24-hour care services provided at state psychiatric hospitals. It excludes community based other-24 hour and community based inpatient expenditures.

Total also includes additional SMHA Expenditures for research, training, administration, and other central and regional office expenditures.

Data from NRI's Funding Sources and Expenditures of State Mental Health Agencies, FY 2008 reports - Table 18 "SMHA-Controlled Expenditures for Mental Health Services."

U.S. totals are based on 50 states reporting.

More information on the State Mental Health Agency's Revenues & Expenditures as well as State Footnotes can be found on the NRI website:
<http://www.nri-inc.org/projects/Profiles/RevenuesExpenditures.cfm>

New Jersey

URS Table Number	General Notes
6	The 20% increase in the average Length of Stay (LOS) from 2009 is likely an affect of recent Olmstead efforts. As increasing numbers of consumers are discharged, the more challenging (e.g. medically fragile, immigration issues, legal/Megan's Law considerations) cases remain in the hospital. As such a slight increase in the average LOS is not unexpected.
11	The 26% decline in the Percent of children/adolescents reporting positively about outcomes seen between 2009 and 2010 is valid. The Division of Children's Behavioral Health Services (DCBHS)--the party who provide this data had experienced significant change in the past year which may be responsible for the reported decline in satisfaction. These changes include: a new contract system administrator for utilization management, and an unpopular attempt to realign the relationships of the county Family Support Organizations relative to the Care Management Organizations.
12	The 19% increase of Percent of adults served by the SMHA with co-occurring MH/SA diagnoses seen between 2009 and 2010 is valid, and may indicate better/more accurate screening (and reporting) on the part of contracted providers.
14a	DMHS data does not currently have a way to capture More than One Race, as it is not a category on our Unified Services Transaction Form (USTF). In our prior data submissions for SFY 2009 values associated with the columns labeled "More Than One Race Reported" should have been placed in the columns labeled "Race Not Available".
16	The 19% increase (from 2009) in the total number of adults receiving supported housing services is valid. For Child Consumers Receiving Therapeutic Foster Care Services, MST Services and Family Functional Therapy services, the percent increase in all three categories (100%) between SFY 2009 and SFY 2010 is attributable to the fact that DCBHS did not provide us with relevant data in SFY 2009.
17	Family Psychoeducation services increased 22% between 2009 and 2010 and this increase is likely attributable to both more refined reporting and to an increased awareness/recognition of this program. Integrated Dual Dx Services: The 281% increase seen between 2009 and 2010 is a direct reflection on increased cooperation from providers on the reporting of MH consumers whom were dually diagnosed with Substance Abuse Issues. The value for illness Self Management Services increased dramatically from 2009 to 2010 due to changed reporting practices of the provider. Specifically, in years past the reporting entity would only provide numbers of consumers served by only those agencies receiving fidelity training in the past year by the reporting entity. In SFY 2010 the reporting entity has provided numbers on all known consumers served at all provider agencies, regardless of if an agency has received fidelity training in the past year or not.
20B	The decrease in Total Percent Readmitted (both within 30 and 180 days) has decreased 50% for both categories between SFY 2009 and SFY 2010. The most likely explanation for this improvement is the establishment of the DMHS Centralized Admissions Unit in February 2010. It is believed that this unit has meaningfully improved the overall admissions process to NJ state psychiatric hospitals, and as a result, readmissions have decreased.
