Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS/DIG Table 3.

This table uses data from URS/DIG Table3 and 6.

Table 3 State Notes:

Age None
Overall None
Gender None

Table 6 State Notes:

Hospital PA serves very few children in SMH. One person staying longer in this instance skews the results.
Other Inpatient None
Residential There has been a focus on reducing RTF admissions.
Community Different methodology on calculating those served at beginning of year was used this year.
Overall A different data source was used this year. We believe that it is more accurate.

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data for URS/DIG Table 4a.

Pennsylvania

URS Table Number	General Notes
All	All data in this set of tables derives from services received on July 1, 2008 and June 30, 2009. For the survey, although conducted in 2010, the surveys were sent to individuals receiving services between the dates indicated.
4	Period 7/1/08-6/30/09 Data is updated annually for county consumers, quarterly for managed care consumers. Data is not collected for Fee for Service consumers. The decreased in total number of consumer employed and total number of consumers not in labor force are due to economic downturn.
6,12	The large 1 year change data is due to we used a different data source and different methodology this year.
20a	Total percent readmitted within 180 days number increased is due to the closure of Mayview in 2008 readmissions at 180 days may have increased.
20, 21	Total percent readmitted within 30 days and 180 days numbers increased is due to the number of forensic admissions declined from 2009 to 2010.
5A	The decrease in total number of consumers with non-medicaid funding only and total number of consumers with both Medicaid and non-medicaid funding are due to CCRI pilot- only a few counties have registered their consumers in this new system, resulting in substantially lower numbers. The increased in total number of consumers with medicaid funding only is due to as more counties are able to register their consumers, this number will increase.
15	Total number of consumers living in Private Residence have increased and total number of consumers homeless/shelter have decreased between 2009 and 2010 because Pennsylvania adopted a new method of identifying living arrangement for our consumers. Previously, we used information that was collected only at admission for managed care. We believe this year's figure is more accurate.
16	Total number of consumers receiving supported housing services, supported employment services and family functional therapy services have decreased between 2009 and 2010 due to change in data source, which we believe to be more accurate than what was used previously. Total number of consumers receiving ACT services between 2009 and 2010 is due to PA has an initiative to provide ACT services. Total number of consumers receiving family functional therapy services has large increase between 2009 and 2010 because we are able to report on a larger portion of the population this year, resulting in a larger number increased.
