### Note:

Are Client Counts Unduplicated? Unduplicated Number of States with Unduplicated Counts 43

This table uses data from URS/DIG Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2009

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

### State Notes:

#### Table 2a

Age None  
Gender None  
Race None  
Overall RI has no state psychiatric hospital, but rather adult psychiatric/forensic units in a general hospital and acute inpatient care contracted through private hospitals.

#### Table 2b

Age None  
Gender None  
Race None  
Overall RI has no state psychiatric hospital, but rather adult psychiatric/forensic units in a general hospital and acute inpatient care contracted through private hospitals

State used Federal SMI Definition? No Use client's DSM IV Diagnosis code only

Diagnoses included in State SMI definition 295-298.99

State used Federal SED Definition? No Use client's DSM IV Diagnosis code only

Diagnoses included in State SED definition 295-298.99 and 314

**Note:**

This table uses data from URS/DIG Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2009

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

	Age NA	-	-	41	3,523	1,882	3,286	-	1.07	16

### **Note:**

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS/DIG Table 3.

This table uses data from URS/DIG Table3 and 6.

#### **Note:**

\*In Labor Force is the sum of consumers employed and unemployed.

\*\*With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data for URS/DIG Table 4a.

## Rhode Island

URS Table Number	General Notes
2, 3, 6	RI has no state psychiatric hospital, but rather adult psychiatric/forensic units in a general hospital and acute inpatient care contracted through private hospitals
2,3,6,12,14,15	Only children served through the community mental health centers data are included.
17	Table 17 data regarding Family Psychoeducation and Illness Self Management unavailable.
18	Table 18 data regarding Adults with Schizophrenia receiving New Generation Medication unavailable.
21	Table 21 unavailable. The Division does not have access to data regarding inpatient psychiatric hospitalizations other than those that are state-funded.
4	Total number of consumer's unemployed/not in labor force increasing/decreasing from 2009 to 2010 is due to an artifact of a change in our data collection system. In 2009, we had a choice of "Don't Work and not currently looking", which was then folded into the "Not in Labor Force" category. As of 2010, we no longer have that response option, and such clients are now counted in the "Unemployed" category.
5A	Total number of consumers with Medicaid-only funding increased by 22% from 2009 to 2010 is a result of people being appropriately moved from the "Medicaid and Non-Medicaid" category due to improvements in our data entry validations and subsequent analysis of this field.
9,11,11a	The Rhode Island Department of Behavioral Health, Developmental Disabilities, and Hospitals, although the State authority overseeing adult mental health care, has no pervue over children's mental health care, which resides with the Department of Children, Youth, and Families. To date we've had limited access to many of the measures relating to children in these tables.
15	Increase in number of people in Private Residence (and Homeless/shelter) from 2009 to 2010. Both of these changes are accurate and due primarily to improved reporting resulting in a decrease of missing/unknown values from 2009 to 2010.
16	EBPs may have "unknown" values for age/gender though SMI/SED counts do not. This occurs because SMI/SED counts are from client-level demographic records, whereas EBP counts are aggregated from summary tables from providers who may submit unknown counts.
