Note:

Are Client Counts Unduplicated? Unduplicated **Number of States with Unduplicated Counts** 43

This table uses data from URS/DIG Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2009

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 2a

Age Age is calculated based on the midpoint (January 1, 2010) of the time period of interest (FY2010: July 1, 2009 - June 30, 2010)
Gender None
Race None
Overall See General Notes

Table 2b

Age Age is calculated based on the midpoint (January 1, 2010) of the time period of interest (FY2010: July 1, 2009 - June 30, 2010)
Gender None
Race None

State used Federal SMI Definition? Yes

State used Federal SED Definition? Yes

Note:

This table uses data from URS/DIG Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2009

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
WA	-	-	-	-	At admission and then every 90 days
US	43	26	4	5	33

Note:

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS/DIG Table 4.

State Notes:

Age Age is calculated based on the midpoint (January 1, 2010) of the time period of interest (FY2010: July 1, 2009 - June 30, 2010)

Gender None

Overall See General Notes

Outcomes Domain: Employment Status of Adult Mental Health Consumers Served in the Community by Diagnosis, FY 2010

**Structure Domain: Federal Mental Health Block Grant Expenditures for Non-Direct Service Activities, FY 2010
Washington**

Service	Non-Direct Block Grant Expenditures	% Total	US % Total
Technical Assistance Activities	\$695,000	40.1%	30.2%
Planning Council	\$89,000	5.1%	2.1%
Administration	\$417,200	24.1%	19.8%
Data Collection/Reporting	\$340,000	19.6%	5.6%
Other Activities	\$190,500	11.0%	42.4%
Total	\$1,731,700	100.0%	100.0%

Note: This table use data from URS/DIG Table 8.

State Notes:

None

Structure Domain: Mental Health Programs Funded By the Federal Mental Health Block Grant, FY 2010

Washington

Programs = 15

Total: \$6,719,539

Agency Name	Address	Agency Director	Phone Number	Block Grant
Capital Clubhouse				\$26,100
Tribal Programs				\$120,000
Douglas County				\$108,865
Clark County				\$423,288
Grays Harbor County				\$70,748
King County				\$1,880,150
North Central Washington Regional Support Network				\$216,633
North Sound Regional Support Network				\$1,098,134
Kitsap County				\$344,059
Cowlitz County				\$98,787
Spokane County				\$458,013
Thurston County				\$300,952
Timberlands Regional Support Network				\$100,384
Greater Columbia Behavioral Health				\$669,757
United Behavioral Health				\$803,669

Washington

URS Table Number	General Notes
Table 2A & 2B	The number of MH clients served increasing from 2009 to 2010 is due to the Pierce region, where race break-outs for clients in the Pierce region for 2009 are all "not available". The data element then was not collected in the Pierce region in 2009.
4 & 4A	WA State collects two types of data on mental health services: encounters and non-encounters. Encounters record the actual services provided to clients. Non-encounters are demographics, outcomes and episodes of specific treatment and authorization, and quasi-outcome measures such as employment, education, living situation, etc. (we call them "consumer periodics"). We do not collect "periodic" data on clients discharged from inpatient stays, and therefore would not have employment data on those clients if they were not served in any community outpatient setting.
5A & 5B	The total number of consumers with both Medicaid and Non-Medicaid funding has increased from FY 2009 to FY 2010. The number of Medicaid eligible citizens in our state has increased by 225,000 from FY2009 to 2010. While the ratio of people eligible to those served in both years has remained steady at 11%, given the increase in the number of eligible persons, the number of people served has increased and we have seen an increase in the types of service in 18 of our state plan modalities for mental health care
Table 8	The increase in "MHA Technical Assistance Activities" is due to a decrease in "MHA Activities Other Than Those Above" as well as an increase in non-direct service activities that were sponsored by the WA State.
Table 10	WA State contracted directly with providers in Pierce County in 2009 because there was no managed care organization that covered that county. In 2010, there was again a managed care organization in place that the state directly contracted with. Therefore, the number of agencies directly receiving block grant funds from the state are smaller than that reported in 2009.
Table 11a	Hispanics counts were done by different sources and the format of the data were different between 2009 and 2010. Hispanics were counted within the races that they fit and separately as an ethnicity in 2009. In 2010 they were counted only as ethnicities and were not included within their corresponding race.
14A & 14B	Because the total counts of African American in Table 2A has increased by 24% comparing to SFY 2009, we feel the counts for SFY 2010 are an accurate reflection of the data. We saw an increase of 12,500 African-Americans eligible for Medicaid in SFY 2010, compared to 2009. We also saw an increase of 2000 more African-American consumers served in 2010 compared to 2009. It seems reasonable to us that there would be a concomitant increase in the numbers of African Americans served that are SMI or SED
15	We saw a 3% drop in the number of people served in community mental health centers in SFY 2010, compared to 2009. We also saw a 3% increase in the number of people served in Jails or Correctional Facilities, along with increases in people served in other non-CMHC locations. SFY2009 included the second half of the calendar year 2008, which was the period where all encounters were used by an actuarial firm to set new Medicaid rates. Some of the disparities found in the rate study included how providers were coding the location of services. We suspect that this increase in counts of people served in Jail or Correctional Facilities is actually a change in coding practice, towards more accuracy. Some providers base their staff in jails and prisons and provide services there, in an effort to engage people into treatment upon release. Some state funds are used to provide these services, but distinct counts of clients served across the two fiscal years includes both Medicaid and Non-Medicaid clients, and the shift in coding practice was across all clients served, not just those with Medicaid
Table 16, 17	There were more providers participating in EBP survey than 2009. Therefore, the numbers of clients served increased. However, collecting this information via a Provider Survey limited the amount of individual-level client data that could be collected. Therefore, we don't have any of the demographic breakouts and we don't know for sure if the clients who received these services are seriously mentally ill or seriously emotionally disturbed. Also, we cannot answer any of the questions about implementation - all of our responses would be "don't know" at this time. However, when we are able to assess this information in the future it would be helpful to have a response option that allowed for some providers implementing using toolkit and some implementing without.
