Note:
This table uses data from URS/DIG Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2010

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS/DIG Table 3.

This table uses data from URS/DIG Table3 and 6.

Table 3 State Notes:

Age Residential treatment center data has been corrected to exclude adult residential treatment centers.
 Overall None
 Gender None

Table 6 State Notes:

Hospital Includes state-operated regional treatment centers and community behavioral health hospitals
 Other Inpatient Includes state-contracted beds in community hospitals and all other psychiatric inpatient services in community hospitals
 Residential Data has been corrected to exclude adult residential treatment centers
 Community Minnesota does not have a single point of entry into its public mental health system for community-based Programs. With over 600 providers, Minnesota cannot determine admissions into community programs.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data for URS/DIG Table 4a.

State Notes:

Adults receiving Assertive Community Treatment, Rehabilitative Mental Health Services or Day Treatment. Data is from calendar year 2010.

CONSUMER SURVEY RESULTS, FY 2011

STATE: Minnesota

Indicators	Children: State	Children: U.S. Average	States Reporting	Adults: State	Adults: U.S. Average	States Reporting
Reporting Positively About Access	85.4%	83.0%	50	83.6%	85.7%	51
Reporting Positively About Quality and Appropriateness				82.8%	88.9%	51
Reporting Positively About Outcomes	75.9%	64.6%	51	79.4%	70.6%	51
Reporting on Participation in Treatment Planning	89.6%	86.3%	51	85.4%	80.7%	51
Family Members Reporting High Cultural Sensitivity of Staff	89.1%	92.4%	50			
Reporting positively about General Satisfaction with Services	83.0%	83.0%	51	82.8%	89.1%	51

Note: U.S. Average Children & Adult rates are calculated only for states that used a version of the MHSIP Consumer Survey

This table uses data from URS/DIG Table 11.

Children/Family	State	U.S.
Type of Survey Used	Minnesota-developed survey, based on MHSIP	YSS-F=42

Type of Adult Consumer Survey Used	28-Item MHSIP	Other MHSIP	Other Survey
state	-	Yes	-
U.S.	31	21	-

Sample Size & Response Rate	Children: State	Children: U.S.	States Reporting	Adults: State	Adults: U.S. Average	States Reporting
Response Rate	11.0%	42.0%	46	21.5%	45.2%	45
Number of Surveys Attempted (send out)	6,000	153,558	45	7,500	235,370	43
Number of Surveys Contacts Made	5,811	110,734	40	7,041	172,471	41
Complete Surveys	638	55,650	50	1,513	111,527	50

Populations covered in survey	Children: State	Children: U.S.	Adults: State	Adults: U.S.
All Consumers	-	5	-	1
Sample	Yes	46	Yes	51

Sample Approach	Children: State	Children: U.S.	Adults: State	Adults: U.S.
Random Sample	Yes	13	-	13
Stratified Sample	-	16	Yes	16
Convenience Sample	-	15	-	17
Other Sample	-	5	-	6

Who is Sampled?	Children: State	Children: U.S.	Adults: State	Adults: U.S.
Current Clients	Yes	51	Yes	52
Former Clients	-	19	-	18

Populations included in sample: (e.g., all adults, only adults with SMI, etc.)	Children: State	Children: U.S.	Adults: State	Adults: U.S.
All Children or Adults Served	-	28	-	29
SMI Adults or SED Children	Yes	20	Yes	19
Persons Covered by Medicaid	Yes	8	Yes	8
Other	-	12	-	10

State Notes:

Adult survey is of psychosocial rehab clients only - See General Notes. 2011 we surveyed Children with SED and non SED children, response rate decreased dramatically due to this.

Minnesota

URS Table Number	General Notes
All	Tables labeled 2010 are developed using calendar year 2010 data. Tables labeled 2011 are developed using State Fiscal Year 2011 data. (July 1, 2010 through June 30, 2011)
3, 6	Residential Treatment Centers was corrected to exclude Adult RTC, decrease total number served and increase in percentage of those served for Age 0-17. Residential treatment centers include mental health treatment in centers licensed by the SMHA.
3, 6	Other Psychiatric Inpatient includes regular psychiatric beds and state-contracted beds in community hospitals.
4	Like other states, Minnesota has experienced an economic slowdown resulting in an increased unemployment rate. The rate of unemployment increased by 1% which was equivalent to the statewide unemployment rate increase of .8%. There was a shift in the unemployed category; females (decrease 3%) and males (increase 3%). One explanation is the continued decrease in labor/manufacture field.
6	Minnesota continues to focus on developing home and community services in lieu of institutional placements resulting in fewer patients.
8	The SMHA has increased its efforts to evaluate quality of mental health services; to train providers in research supported evidence based practices, to implement evidence based practices, to provide technical assistance to providers and payors of mental health services. Due to state budget realities, the SMHA has experience some reduction in state funding for these activities.
9SC, 11, 19a	In 2011 the population from which the sample was drawn are those persons who receive Assertive Community Treatment, Adult Rehabilitative Mental Health Services, or Day Treatment service during calendar year 2010.
11, 11a	Minnesota developed its own Adult and Family survey, based on MHSIP
12, 14	In 2008, Minnesota combined the population served to include the Community Mental Health Reporting System (CMHRS) and the Medicaid Management Information System (MMIS). With the addition of the MMIS claims data, a methodology was developed to determine whether the recipient was likely to have a serious mental illness (SMI) or a severe emotional disorder (SED). The method for children with SED was further refined this year.
12	Minnesota is not able to report the percentage of adults and children/adolescents served by the SMHA who also have a diagnosis of substance abuse problem because clients could receive substance abuse treatment by another payor and only one diagnosis is required when Medicaid services are claimed.
14A	Although the State Mental Health Authority does not fully understand the reason for the size of the increase in consumers reporting themselves as members of multiple racial groups (from 2010), it is believed that, in part, it reflects: (a) Increased comfort and acceptability by the larger society, and individuals to identify themselves this way; rather than past emphasis on identification with a single race; (b) SMHA support in the development of provider agencies that target servicing Tribal, racial and ethnic minorities and immigrant/refugee communities; (c) SMHA use of federal Community Mental Health Services block grant funds to increase access by adults with SMI and children with SED to cultural competent mental health services; (d) SMHA support of the professional credentialing/licensing of graduate students who are members of racial/ethnic minority groups; (e) SMHA support of provider training in cultural competency; and (f) SMHA outreach to racial and ethnic minority communities. There are many partners with the SMHA who are supporting efforts to increase access to and cultural appropriateness of mental health services for members of racial and ethnic minority communities.
15	Data for living situation is reported for adults receiving Assertive Community Treatment, Rehabilitative Mental Health Services or Day Treatment. Data is for Calendar Year 2010.
16	Minnesota is unable to report Children's EBP service because: Minnesota does not provide this tool-kit EBP. Minnesota is in the third year of transforming its children's mental health system through development of the Hawaii Model of evidence-based practices.
16	The growth in the utilization of supported employment/individual placement services (EBP: SE/IPS) model for CY 2010 by 18% is indicative of maturing MN IPS pilot program services. With maturation, there is a greater awareness throughout community MH Services about employment and its' impact on recovery. Through the use of the IPS Fidelity Review process, there are higher levels of collaboration measured between traditional MH community services and employment service providers. This has resulted in more efficiency in processing potential referrals between service providers as well as effectiveness in collaborating external partners such as MN/DEED-VRS.
17	Minnesota is unable to report Integrated Treatment for Co-occurring services due to grant ending, plan to implement new data collection methods.

URS Table Number	General Notes
17	Minnesota is unable to report Illness Self Management service because: Minnesota does not monitor this service for EBP; also there is not a separate CPT code for Illness Self Management it is bundled with EBP ACT and ARMHS service.
20A	The federal definition of "state hospital" includes the new state-operated 16-bed community-based behavioral hospitals (CBHH's). Reductions of 30-day readmissions were not projected to decrease because CBHH's include the flexibility of very brief length of stay based on the consumers needs; and not necessarily indicative of inadequate community-base service alternatives or poor discharge planning. This is one of the ways that CBHH's do not function like the old institutional state hospital model where an admission typically had at least a two month length of stay. The SMHA has concerns that this measure, as defined, is not an adequate reflection on Minnesota's efforts to improve its community mental health system, and use short term community psychiatric hospitals.
