URS Table Number	General Notes
4	In 2016, the percent of clients that were not in labor force decreased by 24%, while the percent of clients that were employed and unemployed increased. As a percent of total served, the percent of client that were employed and unemployed only increased by 2 percent.
6	FY2015 admissions to community programs and LOS of adults in state hospital had an inadvertent coding error. The FY2016 numbers accurately reflect the number of admissions to community programs and the LOS of clients that have been in the state hospital for decades.
8	There are three primary reasons for the 41% increase in total MHBG expenditures for non-direct services from FY2015. (1) RDA staff costs were a little higher; (2) The amount paid to University of Washington (UW)/Washington State University (WSU) for their BG contracts. During SFY15, there were 16 MHBG headquarter projects that UW and WSU were paid for, during SFY16 there were 20 different MHBG HQ projects that UW/WSU incurred expenditures working on. Expenditures in any category can be impacted by the timeliness of billings from the vendors, if they are behind in their billings at the end of any one fiscal year (FY1), we accrue these and then pay them in the in ensuing year (FY2), these payments would be reflected in FY2. This impacts how much is reported each year if vendors are not consistent in their billings every year; (3) the 2016 data included BHO non-direct expenditures that were not reported in previous years.
12	Some of the SUD providers are continuing to have some trouble reporting SUD services to the SMHA's new system so there may be some under-reporting on the SUD side which may explain the decrease in the percent of adults and children served by the SMHA with a co-occurring MH/SA diagnoses.
