Unduplicated

Number of States with Unduplicated Counts

43

This table uses data from URS Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2017

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

Notes:

US totals are based on states reporting.

This table uses data from URS Table 15a.

US penetration rates are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

Age	None
Gender	None
Overall	Populated by NRI using Alabama's 2018 MH CLD-BCI dataset

Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2018

Alabama

Reporting Period: 10/1/2017 To: 9/30/2018

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	91.3%	70.3%	73.0%	56
Percent of Children served through the SMHA who meet the Federal definition for SED	97.7%	69.7%	69.5%	54

Co-occurring MH and Substance Abuse Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	20.2%	27.5%	27.0%	56
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	1.7%	4.2%	3.0%	53
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	20.1%	25.7%	24.0%	55
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	1.7%	7.3%	3.0%	52

Note

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

Primary ICD 10 Diagnosis and Primary ICD 10 Substance Abuse Diagnosis are captured in the DMH Central Data Repository for each client served. If the client has a diagnosis in both of these fields, the client is counted as having a co-occurring disorder.

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table 3 and 6.

Alabama

URS Table Number	General Notes
6	Decrease in admission to other psychiatric inpatient by be linked to two factors. One is that ADMH has implemented a UR process that involved the care coordination at an earlier point which may be linked to the decrease as more opportunity to divert to more appropriate settings. Also, several reporting providers converted to their next generation of electronic health records which caused some data issues in their reporting to ADMH.
7/7A	Increase in total MHBG expenditures, total CSC-evidence-based practices for first episode psychosis expenditures, and total administration expenditures from FY2017 are a result of the increase MHBG award Alabama received from SAMHSA
12	Increase in C&A being served with co-occurring MH-SA may be linked to the integration of our Mental Health and Substance Abuse Divisions. Through this process, we have integrated several of our processes to include certification, performance improvement, and data elements. When converting to ICD 10 reporting, we focused on acceptable SA co-occurring reporting codes and trained providers on these areas, The efforts have left to improved identification and reporting.
14A	SMI Definition: Person who meets the diagnosis and disability criteria or who meet the criteria for high risk. Disability Criteria (must meet at least 2 criteria plus diagnosis criteria). (1) Is unemployed, is employed in a sheltered setting or has markedly limited skills and a poor work history. (2) Shows severe inability to establish or maintain personal social support systems. (3) Shows deficits in basic living skills. (4) Exhibits inappropriate social behavior. High Risk (must meet one of the criteria). (1) History of DMH/MR supported inpatient or public residential treatment as a result of an Axis I Mental Illness diagnosis. (2) Person would become at imminent risk of needing inpatient hospitalization without outpatient intervention.
14A	SED Definition: Person must meet the diagnosis criteria and Separation from Family or meet diagnosis criteria and Functional Impairments/Symptoms/Risk of Separation Criteria
15	Increase in total number of clients in jail/correctional facilities may be linked to the care coordination focus efforts through several avenues. These include coordinated efforts with the Department of Corrections and the Alabama Board of Pardons and Parole. ADMH has engaged our reporting providers to extend their mental health care to more outreach settings to include jails and detention facilities. Also, ADMH has initiated several outreach programs, such as Stepping Up, that implements a more integrated care coordination system. Furthermore, ADMH is under a forensic settlement agreement that has shifted some of the assessment, evaluation, and treatment process away from our state facilities to our contracted providers which has shown an increase of these provision of services in jails and detention facilities.
