

## Colorado 2017 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	7,524,119	24.23	23.00	58
Community Utilization per 1,000 population	7,318,598	23.63	22.37	58
State Hospital Utilization per 1,000 population	131,633	0.27	0.40	54
Other Psychiatric Inpatient Utilization per 1,000 population	446,562	-	1.61	39

Adult Employment Status	U.S.	State	U.S. Rate	States
Employed (Percent in Labor Force)*	699,316	46.1%	43.8%	57
Employed (percent with Employment Data)**	699,316	31.0%	20.9%	57

Adult Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	91.7%	78.7%	49

Child/Family Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	92.9%	73.1%	46

Readmission Rates:(Civil "non-Forensic" clients)	U.S.	State	U.S. Rate	States
State Hospital Readmissions: 30 Days	6,829	2.5%	8.3%	50
State Hospital Readmissions: 180 Days	15,719	6.5%	19.2%	52
State Hospital Readmissions: 30 Days: Adults	6,323	2.6%	8.6%	49
State Hospital Readmissions: 180 Days: Adults	14,441	6.0%	19.6%	51
State Hospital Readmissions: 30 Days: Children	450	2.2%	6.3%	16
State Hospital Readmissions: 180 Days: Children	1,158	11.1%	16.1%	20

Living Situation	U.S.	State	U.S. Rate	States
Private Residence	4,115,700	86.3%	82.7%	58
Homeless/Shelter	210,479	5.4%	4.2%	54
Jail/Correctional Facility	86,943	1.4%	1.7%	53

Adult EBP Services	U.S.	State	U.S. Rate	States
Supported Housing	89,414	0.1%	3.0%	35
Supported Employment	62,596	1.2%	2.0%	41
Assertive Community Treatment	74,032	2.4%	2.1%	41
Family Psychoeducation	35,658	0.3%	2.8%	15
Dual Diagnosis Treatment	237,513	4.5%	11.7%	28
Illness Self Management	318,831	0.6%	20.0%	22
Medications Management	554,087	5.3%	34.6%	22

Child/Adolescent EBP Services	U.S.	State	U.S. Rate	States
Therapeutic Foster Care	9,728	-	1.2%	21
Multisystemic Therapy	26,180	0.6%	3.8%	17
Functional Family Therapy	24,574	1.6%	4.6%	15

Change in Social Connectedness	State	U.S. Rate	States
Adult Improved Social Connectedness	53.7%	78.8%	48
Child/Family Improved Social Connectedness	76.5%	87.2%	46

\*Denominator is the sum of consumers employed and unemployed.

\*\*Denominator is the sum of consumers employed, unemployed, and not in labor force.

## Note:

US totals are based on states reporting.

This table uses data from URS Table 15a.

US penetration rates are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

## State Notes:

Age	Age based on last day of previous FY if client open at beginning of current FY; otherwise, age based on admission date in the current FY
Gender	None
Overall	Excludes served clients with a mental retardation, substance abuse, or alcohol primary diagnosis listed for their last admission. Clients are duplicated between State hospitals and community agencies.

**Access Domain: Adults with SMI and Children with SED Served in State Psychiatric Hospitals by Age and Gender, FY 2017**

**Colorado**

**Notes:**

US totals are based on states reporting.

This table uses data from URS Table 15a.

US penetration rates are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

**State Notes:**

Age Age based on last day of previous FY if client open at beginning of current FY; otherwise, age based on admission date in the current FY

Gender None

Overall Excludes served clients with a mental retardation, substance abuse, or alcohol primary diagnosis listed for their last admission. Clients are duplicated between State hospitals and community agencies.

**Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2017**

**Colorado**

**Reporting Period: 7/1/2016 To: 6/30/2017**

<b>Adults and Children who meet the Federal Definition of SMI/SED</b>	<b>State</b>	<b>US Average</b>	<b>US Median</b>	<b>States Reporting</b>
Percent of Adults served through the SMHA who meet the Federal definition for SMI	74.0%	72.0%	71.0%	54
Percent of Children served through the SMHA who meet the Federal definition for SED	65.0%	70.9%	68.0%	54

<b>Co-occurring MH and Substance Abuse Consumers</b>	<b>State</b>	<b>US Average</b>	<b>US Median</b>	<b>States Reporting</b>
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	5.5%	25.4%	23.0%	56
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	1.0%	6.2%	4.0%	56
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	0.4%	23.3%	21.0%	53
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	0.1%	5.1%	3.0%	53

**Note**

This table uses data from URS Table 12.

**How are the number of clients with co-occurring disorders counted and calculated?**

Co-occurring is collected by referencing other diagnoses submitted on the Colorado Client Assessment Record. If there is an SUD diagnosis, then the client is assumed co-occurring. See comments for more information.

## **Note:**

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table3 and 6.

## **Table 3 State Notes:**

Age based on last day of previous FY if client open at beginning of current FY; otherwise, age based on admission date in the current FY  
 Overall Excludes served clients with a mental retardation, substance abuse, or alcohol primary diagnosis listed for their last admission  
 Gender None

## Colorado

URS Table Number	General Notes
All	Colorado is executing the creation of a unified data reporting system which will allow for more accurate data collection and reconciliation for both co-occurring reporting and evidence based practice reporting. It is anticipated this system will be live in FY2019.
5A	The numbers served field is calculated on a field on the OBH treatment record, and therefore, may be limited in its accuracy as it is not on claims data. However, with that being said, the Office has created models where block grant funds are used to supplement Medicaid spending. Some agencies will count this supplement as a both (Medicaid and Non-Medicaid), even though the client's treatment is funded by Medicaid. It is this practice and a lack of cross-edits in the current data systems that suggest a 19% increase in consumers funded by Medicaid and non-Medicaid.
6	OBH has increased the number of residential and acute treatment units in the state with the crisis system funding.
8	The standard URS table 8 expense activities changed from FY 2015-16 to FY 2016-17 changed which drove the 36% change.
12	When comparing FY17 to FY16, there was an uncaught data error reported in FY16. This year, we see the % of persons with SMI/SED and co-occurring to be .4% and .1%. However, due to a formatting error, last year's 3.b.1 and 3.b.2 were 4% and 1%. This shift is not an artifact of a decrease in services to this population. Rather, the state's method of referencing co-occurring from only a mental health treatment record where the primary diagnosis cannot be an SUD, limits the captured incidence of co-occurring disorders.
16	When comparing FY17 to FY16, there is a marked decrease in persons served by EBP's according to table 16 (especially ACT). However, the state has other data records and programmatic records to indicate the overall admission to ACT and other EBP's have not decreased this dramatically. Rather, the EBP data set does not have any data validation and quality activities throughout the year. The following ACT report example illustrates the conflicting data system efforts and priorities. Specific ACT reports are collected each quarter from all 17 community mental health systems. This data collection is separate from the primary mental health record (CCAR) and the EBP data systems. The programs staff and data staff focus energies on the outcomes and data quality of the ACT specific reports to tie these to performance incentive contracting and fidelity monitoring. This specialty report is reconciled with the primary mental health data reporting (CCAR), but not with the EBP data system. Therefore, it is not appropriate to compare those reports to this table. Without comparison, the state defers confidence in the specialty EBP reports, in comparison to the data validity of the overall EBP data system. Another specific error of the EBP data system was allowing reporting of 432 under 18 children to be submitted with EBP codes which are only appropriate for adults. Lastly, EBP reporting for medication management and receiving integrated treatment for co-occurring disorders have increased the largest. There have been no contractual changes to note why these programs would have expanded statewide; therefore, we cannot comment on the large shift in reporting at this time.
16 & 17	Like FY2016, the EBP data is collected from a separate database. This data base does not allow reconciliation between the key mental health data set (CCAR) and the separate EBP data set. Therefore, we see the different numbers reported in table 16 and 17 then the overall SMI/SED numbers served.
20A/B	This year we adopted the option to have NRI use the State Hospital Record (SHR) to populate these tables to allow for re-admission of 180 days data to be appropriately calculated and consistent across the SHR client level data (CLD) and the URS tables.
