**Note:**
**Are Client Counts Unduplicated?**      Duplicated between Hospitals and Community      **Number of States with Unduplicated Counts**      43

This table uses data from URS Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2017

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

**State Notes:**
**Table 2a**

Age	Age based on last day of previous FY. If client open at beginning of current FY; otherwise, age based on admission date in the current FY.
Gender	None
Race	None
Overall	None

**Table 2b**

Age	Age based on last day of previous FY. If client open at beginning of current FY; otherwise, age based on admission date in the current FY
Gender	None
Race	None
Overall	None

\* Reported under Hispanic Ethnicity.

**Note:**  
This table uses data from URS Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2017

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

**State Notes:**
**Table 14a**

Age	Age based on last day of previous FY if client open at beginning of current FY; otherwise, age based on admission date in the current FY
Gender	None
Race	None
Overall	Excludes served clients with a mental retardation, substance abuse, or alcohol primary diagnosis listed for their last admission. Clients are duplicated between State hospitals and community agencies.

**Table 14b**

Age	None
Gender	None
Race	None
Overall	Excludes served clients with a mental retardation, substance abuse, or alcohol primary diagnosis listed for their last admission. Clients are duplicated between State hospitals and community agencies.

**Access Domain: Adults with SMI and Children with SED Served in Community Mental Health Programs by Age and Gender, FY 2018**

**Notes:**

US totals are based on states reporting.

This table uses data from URS Table 15a.

US penetration rates are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

**State Notes:**

Age	Age based on last day of previous FY if client open at beginning of current FY; otherwise, age based on admission date in the current FY
Gender	None
Overall	Excludes served clients with a mental retardation, substance abuse, or alcohol primary diagnosis listed for their last admission. Clients are duplicated between State hospitals and community agencies.

**Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2018**

**Colorado**

**Reporting Period: 7/1/2017 To: 6/30/2018**

<b>Adults and Children who meet the Federal Definition of SMI/SED</b>	<b>State</b>	<b>US Average</b>	<b>US Median</b>	<b>States Reporting</b>
Percent of Adults served through the SMHA who meet the Federal definition for SMI	74.3%	70.3%	73.0%	56
Percent of Children served through the SMHA who meet the Federal definition for SED	66.5%	69.7%	69.5%	54

<b>Co-occurring MH and Substance Abuse Consumers</b>	<b>State</b>	<b>US Average</b>	<b>US Median</b>	<b>States Reporting</b>
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	6.0%	27.5%	27.0%	56
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	0.7%	4.2%	3.0%	53
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	0.1%	25.7%	24.0%	55
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	0.3%	7.3%	3.0%	52

**Note**

This table uses data from URS Table 12.

**How are the number of clients with co-occurring disorders counted and calculated?**

Co-occurring is collected by referencing other diagnoses submitted on the Colorado Client Assessment Record. If there is an SUD diagnosis, then the client is assumed co-occurring. See General Notes for more information.

**State Notes**

None

**Note:**

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table 3 and 6.

**Table 3 State Notes:**

Age Age based on last day of previous FY if client open at beginning of current FY; otherwise, age based on admission date in the current FY  
 Overall Excludes served clients with a mental retardation, substance abuse, or alcohol primary diagnosis listed for their last admission  
 Gender None

What populations are reported? All Clients Number of States Reporting All Clients: 49 Number of States Reporting Some Clients: 9

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
CO	Yes	-	-	-	Annually
US	42	29	4	5	27

### Note:

\*In Labor Force is the sum of consumers employed and unemployed.

\*\*With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

### State Notes:

Age	Age based on last day of previous FY. If client open at beginning of current FY; otherwise, age based on admission date in the current FY
Gender	None
Overall	None

**Outcomes Domain: Employment Status of Adult Mental Health Consumers Served in the Community by Diagnosis, FY 2018**

**Colorado**

**Reporting Period: 7/1/2017 To: 6/30/2018**

## Colorado

URS Table Number	General Notes
All	Colorado is executing the creation of a unified data reporting system which will allow for more accurate data collection and reconciliation for both co-occurring reporting and evidence based practice reporting. It is anticipated this system will be live in FY2020.
6	1) Total Admission to State Hospital During the Year: Explain -19% change between FY2017 and FY2018. The combination of closing a specialty program and the shifting of occupancy to those who stay longer contributed to the drop of admissions from FY17 to FY18. One of our programs that had 87 admissions in FY17 closed at the end of the year. This was a specialized substance abuse treatment program which was not replaced in FY18. Another program had a drop of 17 admissions from the previous year. These two factors account for 104 of the 180 fewer admissions at one of our hospitals. A related factor contributing to fewer admissions is that the State Hospitals had to give higher priority to forensic restoration commitments in FY18 as compared to FY17. These admissions tend to occupy beds far longer, which lowers the rate of admissions. 2) Average LOS of children (in facility <1 year) who were state hospital residents at the end of the year: -25% change between FY2017 and FY2018 - the difference in ratio of Forensic to Civil legal status child LOS on the last day of the fiscal year would explain the drop in average LOS from FY17 to FY18. Forensic patients (particularly ITP restorations) tend to have significantly longer lengths of stay compared to Civil patients. Average Child LOS for FY17 was calculated from the LOS of 11 patients consisting of 9 Forensic (82%) and 2 Civil legal commitments. Most of the forensic patients were committed to the hospital to be restored to competency after having been found incompetent to proceed with their criminal cases. These patients usually have the longest lengths of stay. Average Child LOS for FY18 was calculated from the LOS of 13 patients consisting of 3 forensic commitments (23%) and 10 Civil legal commitments. Not only were there far fewer forensic patients in this group, two of the three were recent admissions with very small lengths of stay (23 & 25 days) as of 6/30/2018. The increase of average LOS of adults discharged from the Mental Health Institutes can be attributed to a greater number of forensic restoration commitment patients in FY18 as compared to FY17. Forensic restoration commitment patients have a longer length of stay. 3) Total Admission to Residential Treatment Centers During the Year: 35% increase between FY2017 and FY2018 - OBH isolated one agency as being responsible for the increase in residential treatment admissions. This particular agency has had technical issues completing CCARs in years past and is a crisis stabilization service provider for Colorado Crisis Services. OBH feels the increase is due to past under-reporting, which should now be rectified, and continued increases in utilization due to crisis services.
7, 7A	Regarding the decrease in other funds: The funding for the other funds is from commercial insurance payments and self pay. This line will vary from year to year depending on the clients circumstances. Regarding the increase in EBP for ESMI: the program was expanded in 2017 to 3 additional contractors for the last six months of the fiscal year. These contractors invoices for the full 12 months in 2018. Regarding the increase in other 24-hour care: State provided crisis services to reduce 24 hour care and provide services to the clients on an ambulatory non-24 hour care basis. Regarding the increase in ambulatory/other non-24-hour care: State appropriated additional \$6 million for Increasing Access Effective Substance Use Services in 2018. State appropriated additional \$5 to enhance the statewide crisis services in 2018. Regarding the decrease in administrative expenditures: In conjunction with 2 CFR Part 200, the Office of Behavioral Health established a new policy and procedure beginning 2018 clarifying the definition of "direct" program and "administrative" costs under the Mental Health Block Grant and the Substance Abuse Block Grant and other Federal Grant reporting requirements, as well for State and General Funds. The new policy and procedure reduced the expenditures reported as administration and increased the expenditures for direct program expenditures. Regarding Medicaid funds: The Medicaid funds are reported by the institutes and they reviewed the data again. The numbers reported reflect the direct expenses billed to medicaid. As Medicaid is the payer of last resort this number will vary from year to year. There are no major program changes that can be attributed to the variance.
8	Executed contract for Colorado's new data system to streamline mental health and substance use data reporting. Expanded the assurance and improvement of staff functions.
12	When comparing FY16 to FY17, there was an uncaught data error reported in FY16. This year, we see the % of persons with SMI/SED and co-occurring to be 0.4% and 0.1%. However, due to a formating error, percentage of adults with SMI and children with SED with co-occurring SUD were 4% and 1%. This shift is not an artifact of a decrease in services to this population. Rather, the state's method of referencing co-occurring from only a mental health treatment record where the primary diagnosis cannot be an SUD, limits the captured incidence of co-occurring disorders.
14A	After investigating, one CMHC reported 437 Asian consumers in 2017 and 10,821 in 2018. This error lead to an inflation of "More than One Race." Data have been corrected across all applicable tables.

URS Table Number	General Notes
16	The SMHA uses the "Colorado ACT Fidelity Scale," which is based on the SAMHSA ACT scale. Both ACT and IPS are reviewed annually; however, if an ACT service provider scores below "good" fidelity, the provider needs to secure additional training via the SMHA or another source. If a provider scores below "good" fidelity for IPS, the SMHA will conduct another fidelity review every six months until the provider scores "good" fidelity and the SMHA will provide additional training as necessary. Regarding the use of the SAMHSA EBP Toolkits, these kits are used by some programs, but some are out of date. The SMHA was told that SAMHSA anticipates updates to some of these toolkits, including IPS, in the next few years. All CMHCs had ACT training, arranged by the SMHA, in 2012. The SMHA provides IPS training, as needed. The SMHA does not track EBP training at CMHCs.
16, 17	The most likely reason for the one year changes from FY2017 in EBP numbers is that CMHCs often make changes to their EBP programs (e.g., expand a program, eliminate a program, change the scope of a program) and these changes are not reported to the SMHA.
