US totals are based on states reporting.

This table uses data from URS Tables 20a and 20b.

### State Notes:

The change from FY17 to FY18 in terms of percentage was attributed to a small sample of n's. Due to the difference being only 8 clients between 2 and 5%, more research would need to be conducted.

Forensics included in "non forensic" data? No

**Note:**

US totals are based on states reporting.

This table uses data from URS Tables 20a and 20b.

**State Notes:**

The change from FY17 to FY18 in terms of percentage was attributed to a small sample of n's. Due to the difference being only 8 clients between 2 and 5%, more research would need to be conducted.

## General Notes FY 2018

### Delaware

URS Table Number	General Notes
All	Due to a Delaware policy shift in February 2017, DSAMH began collecting information on all clients regardless of payer source. This led to an increase in clients and episodes of treatment in all program types.
All	Improved data collection has been conducted throughout the State to improve accuracy and quality of the data being submitted to Delaware.
6	The State Hospital has experienced a multiyear reduction in admissions due in large part to an increase in alternative options that have led to more individuals being diverted to more appropriate services. This has led to both a decrease in the number of admissions each year as well as eliminating short LOSs for clients inappropriately placed in the facility. This has led to higher mean LOSs for clients admitted to the facility.
7A	Staffing and technology changes have led to an issue that Delaware has since rectified. Due to this problem, it was discovered that a key ESMI program was not included in the initial totals on this chart but a correction would take several weeks to compile. The updated and corrected figure could be supplied at a later date.
12	Delaware has improved its data collection and analysis process as it relates to diagnoses and other fields which has resulted in more accurate identification of client level data and more diagnosis fields being completed accurately.
