Note:

US totals are based on states reporting.

This table uses data from URS Table 15a.

US penetration rates are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

Age   None

Gender   None

Overall   In FY17 DC did not have access to diagnosis data for consumers served by providers that did not use the DC-subsidized electronic health record, so the discrepancy between the total served and those with SMI/SED diagnoses is largely due to missing data

URS Table Number	General Notes
5A	DC continued to successfully prioritize ensuring all eligible consumers were enrolled with Medicaid.
6	For community programs: our data system does not allow us to differentiate between new enrollees and transfers between contracted providers. A high number of consumers transferred in FY17 because of a large provider closure, so the numbers are higher than the previous year
6	For Other Psychiatric Inpatient facilities: we have historically had challenges getting the data from the hospitals since we do not pay for consumers' stays, so there may be data quality issues.
6	For Average LOS of adults discharged from State Hospitals: DBH had more pre-trial admissions to the state psychiatric hospital in FY17 as compared to FY16. These individuals in care tended to have shorter lengths of stay
8	1. Information Systems (software); 2. Infrastructure Support (TA and consultation for DBH Health Home Medicaid SPA for new methodology and rate, and Medicaid billing procedures for DBH Comprehensive Psychiatric Emergency Program; 3) DBH Behavioral Health Council received TA through SAMHSA contractors related to the Advocacy Group and use of data for planning; and 4) DBH staff leadership development training for the Community Services Administration.
12	Not all of our contracted mental health providers submitted diagnosis data to us, so we had issues with the completeness of our diagnosis data. The trend downward for Table 12 may be artificial due to missing information.
16A	DC does not provide these services
16	For Supported Employment: we began using a different funding source at the outset of consumers' services. Once those funds were expended they began to be paid for by DBH. We do not have data for the services paid by the other funding stream, and many people only got services paid for by that stream. There is no indication that we actually served fewer consumers – we just did not have data for many of them. For MST, the only provider closed during the fiscal year. For FFT, the largest provider stopped providing the service during the fiscal year providing the service during the fiscal year.
