Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table 3 and 6.

Table 3 State Notes:

Age See General Notes
 Overall See General Notes. Individuals served in Other Psychiatric Inpatient and Youth in Residential Treatment Centers are also included in the Community Mental Health total.
 Gender None

Table 6 State Notes:

Hospital Data includes inpatient hospital stays in State hospital Adult Mental Health and Secure/Forensic programs. No C&A programs exist in the state hospitals.
 Other Inpatient Due to inconsistent and inaccurate discharge data, discharges and Length of Stay calculations could not be provided.
 Residential Due to inconsistent and inaccurate discharge data, discharges and Length of Stay calculations could not be provided.
 Community Because data is based off of service authorizations it is difficult to determine individuals at beginning of year vs. admission into community services.
 Overall Individual's age is reported as of the beginning of the report period (BOP = 7/1/2017).

General Notes FY 2018

Georgia

URS Table Number	General Notes
All	State Hospital Inpatients are only included where identified and not calculated into overall totals. State hospital inpatient includes stays in Adult Mental Health and Secure (Forensics) programs. Data for hospital outpatients and non-admits (including 23-hour observation) is not included; however, hospital-operated community services are included with other community services. Community Mental Health data includes individuals authorized for residential stays in Psychiatric Residential Treatment Facilities (PRTFs) and state contracted inpatient beds. Authorizations for community services for consumers having at least one authorization with Type of Service of MH or MH/SA Co-Occurring.
All	Age Unless otherwise specified Individuals age was calculated as of the beginning of the report period (BOP = 7/1/2017). Race: "More Than One Race Reported" includes Multi-Racial. "Race Not Available" includes Other Single Race, Unknown, and not reported. Hispanic/Latino Origin: "Not Available" includes "Unknown" and not reported.
4	Table 4 reports data for community consumers only. Employment Status reported in Table 4 is the latest available for the SFY. Employment Status is collected at admission, at discharge, at re-authorization of services, and at addition of new services to an existing authorization. "Employed" includes Competitive Employment and Community Based Non-Competitive Employment. "Unemployed" includes Unemployed But Available for Work = Yes. "Not in Labor Force" includes Facility Based Non-Competitive Employment and Unemployed But Available for Work = No. "Not Available" includes Not Available and Not Reported. The increase in the total number employed is because employment status has been reported on more individuals.
5A, 5B	"Medicaid (only Medicaid)" includes any consumer in Table 2A for whom a Medicaid MRO/PRTF claim was paid, but no State service encounter was reported. "Non-Medicaid Sources (only)" includes any consumer in Table 2A for whom no Medicaid claim was paid, but a State service encounter was reported. "People Served by Both Medicaid and Non-Medicaid" includes any consumer in Table 2A for whom both a Medicaid claim was paid and a State service encounter was reported. "Medicaid Status Not Available" includes all the remaining consumers in Table 2A. The increase in the number of people served by both Medicaid and non-Medicaid is because state Funding increased for a number of programs (e.g. Georgia Housing Voucher).
6	Increase in the total number of consumers served in other psychiatric inpatient settings at the beginning of the year and total admissions to other psychiatric inpatient settings during the year from FY17 are a result of higher utilization of contracted psychiatric beds.
7	MHBG expenditures increased to offset reduced availability of SSBG funding resulting a 92% increase from FY17. The decrease in total Medicaid expenditures from FY17 is due to a decline in the Title XIX Medicaid eligible activities. The decrease in total other funds expenditures from FY17 are a result of lower SSBG available funding. This was offset by an increase in MHBG expenditures. The increase in the total EBP for ESMI expenditures from FY17 is a result of increased number of teams for FEP. The increase in total ambulatory/community non-24 hour care expenditures from FY17 is due to a new State Appropriations (primarily for crisis and housing voucher program).
7A	The increase in the total CSC-evidence-based practices for first episode psychosis expenditures from FY17 is a result of increases number of teams for FEP.
9, 11, 19A, 19B	Survey data includes community consumers only. Both adult and child surveys utilized the standard questions and additional questions added for state purposes.
9, 11, 19A, 19B	C&A Surveys utilized the YSS-F. 2,000 mail surveys were sent at random with only 98 being returned. Thus there was a small N in the survey response.
12, 14A, 14B, 16, 17	SMI/SED information is collected at the time of authorization for community services. Because of a Federal DOJ settlement, DBHDD is required to collect SPMI and it is used for adults on this table. This yields reported counts and percentages of SMI which may be artificially low because SPMI is reported.
14A	SMI/SED status is reliant on provider self reported data.

URS Table Number	General Notes
15	Table 15 reports data for community consumers only. Living Situation reported in Table 15 is the latest available for the SFY. Living Situation is collected at admission, at discharge, at re-authorization of services, and at addition of new services to an existing authorization. "Residential Care" includes living situations "Residential Care" and "PRTF" where the consumer's age was ≥ 18 . "Children's Residential Treatment" includes living situations "Residential Care" and "PRTF" where the consumer's age was <18 . "Crisis Residence" is not included among the response options for living situation in Georgia's information system. "NA" includes living situation Not Reported.
16	"Total unduplicated N - Adults with SMI served" includes only community consumers. "Total unduplicated N - Children with SED" includes only community consumers. See also note for tables 12, 14A, 14B, 16, and 17.
16	The decrease in the number of consumers receiving family functional therapy and total number of children with SED from FY17 are due to the overall reduction in the number of youth served. Most children are served within Medicaid's Managed Care.
17	Report of Illness Self Management was expanded this year to include Individual & Group modalities of Peer Supports and Psychosocial Rehabilitation. This also include Peer Support Whole Health & Wellness.
20A	Data: This table presents duplicated counts of consumers discharged from a state hospital adult mental health inpatient programs between 1/1/2018 - 12/31/2018, and those consumers' subsequent readmissions within 30/180 days of discharge. Calendar year was used for this table instead of State Fiscal Year because 180 days from the end of the State Fiscal Year would not have passed by the due date of this report. Age: Data is based on the consumer's age at discharge. Race: "Race Not Available" includes "Other Single Race."
20B	Data: This table presents duplicated counts of consumers discharged from a State hospital Forensice/Secure inpatient programs between 1/1/2018 - 12/31/2018, and those consumers' subsequent readmissions within 30/180 days of discharge. Calendar year was used for this table instead of State Fiscal Year because 180 days from the end of the State Fiscal Year would not have passed by the due date of this report. Age: Data is based on the consumer's age at discharge. Race: "Race Not Available" includes "Other Single Race."
20B	Forensics individuals placed on Conditional Release are discharged. These individuals are monitored and if for any reason they are returned to the hospital, it is counted as a readmission.
