Note

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

Percent of clients served by the SMHA with co-occurring MH/SA diagnosis = (number of clients that have a SUD Dx code listed in the "Substance Abuse (SA) Diagnosis" field the MH-CLD file (field number C-20))/(Number of clients that have a Mental Health Dx code listed in the "Mental Health Diagnosis - One" field in the MH-CLD file (field number C-17)). This process was preformed for both clinets age 0-17 (Children) and 18+ (Adults).

US totals are based on states reporting.

This table uses data from URS Tables 16 and 17.

US averages are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

Table 16: Contracted services do not include breakout of clients by age, race, gender, or ethnicity. Total SMI/SED numbers were counted from SSRS reports and may be different than the MH-CLD extract due to the two different data reporting sets.

Table 17: Clients in the state electronic health record (WITS) with race identified as "Other" are reported in "Race Not Available"

Idaho

URS Table Number	General Notes
5A	The Idaho Department of Health and Welfare, Division of Behavioral health had transitioned to being a non-Medicaid provider during a previous reporting period. As such, no claims are submitted to Medicaid which results in all of the services that are provided to the clients being non-Medicaid.
7	Total Medicaid Expenditures – 16% increase from FY17 is due to Medicaid eligibility change to 300% of Federal Poverty Level primarily affecting Children’s MH services. Total Other Funds Expenditures – 133% increase from FY17 is due to increased SSBG spending on more child residential placement costs (in state and out of state); as well as program costs for children’s mental health reform project in Idaho, shifting to the Youth Empowerment Services (YES) model. Total Other 24-Hour Care Expenditures – 34% increase from FY17 is due to increased Community Hospitalization spending as well as expenditures for the Homes with Adult Residential Treatment (HART) pilot program. Total Administration Expenditures – 20% decrease from FY17: these costs are determined by the state’s federally approved cost allocation plan. Several factors could cause a reduction in these costs such as motor-pool miles driven; office space square feet allocated; fewer HR and IT services; lower director’s office costs; lower staff training and development costs among other possible costs.
7A	Total CSC-Evidence-Based Practices for first Episode Psychosis Expenditures – 36% increase from FY17 is due to increase in MHBG award which increased the minimum 10 % allocation requirements for CSC/FEP.
16	On January 1, 2018, the State of Idaho’s Division of Behavioral Health-Children’s Mental Health was elected to be the delivery method of the Person Centered Planning (PCP) process in Idaho. This process is a key access point for families pursuing services through the new System of Care, Youth Empowerment Services (YES). These families account for the increase in juvenile cases served.
